Thank you for purchasing this projector.

⚠️ WARNING ► Before using this product, please read all manuals for this product. Be sure to read Safety Guide first. After reading them, store them in a safe place for future reference.

About this manual

Various symbols are used in this manual. The meanings of these symbols are described below.

⚠️ WARNING This symbol indicates information that, if ignored, could possibly result in personal injury or even death due to incorrect handling.

⚠️ CAUTION This symbol indicates information that, if ignored, could possibly result in personal injury or physical damage due to incorrect handling.

NOTICE This entry notices of fear of causing trouble.

Please refer to the pages written following this symbol.

NOTE • The information in this manual is subject to change without notice.

• The manufacturer assumes no responsibility for any errors that may appear in this manual.

• The reproduction, transfer or copy of all or any part of this document is not permitted without express written consent.

Trademark acknowledgment

• Mac® is a registered trademark of Apple Inc.

• Windows®, DirectDraw® and Direct3D® are registered trademarks of Microsoft Corporation in the U.S. and/or other countries.

• VESA and DDC are trademarks of the Video Electronics Standard Association.

• HDMI™, the HDMI logo, and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

• Trademark PJLink is a trademark applied for trademark rights in Japan, the United States of America and other countries and areas.

All other trademarks are the properties of their respective owners.
Features

The projector provides you with the broad use by the following features.

- The HDMI ports can support various image equipment which have digital interface to get clearer pictures on a screen.
- The super bright lamp and high quality optical system can fulfill the demands of professional uses.
- Some optional lens units and the wide range of the lens shift feature will give much more chances to install the product wherever you want.
- The lens shade can hide your inside operations and will help your presentation.
- The wealth of I/O ports is believed to support any business scene.

Checking the contents of package

Please see the Contents of package section in the User’s Manual (concise) which is a book. Your projector should come with the items shown there. Require of your dealer immediately if any items are missing.

⚠️ WARNING ⏸ Keep small parts away from children and pets. Take care not to put in the mouth. If swallowed, consult a physician immediately for emergency treatment.

NOTE • Keep the original packing materials, for future reshipment. Be sure to use the original packing materials when moving the projector. Use special caution for the lens.
• The projector may make a rattling sound when tilted, moved or shaken, since a flap to control the air flow inside of the projector has moved. Be aware that this is not a failure or malfunction.
Part names

Projector

(1) Lamp cover (100)
   The lamp unit is inside.
(2) Speakers (x2) (21, 50)
(3) Filter cover (102)
   The air filter and intake vent are inside.
(4) Elevator feet (x2) (24)
(5) Elevator buttons (x2) (24)
(6) Remote sensors (x2) (18, 64)
(7) Lens
(8) Lens cover
(9) Indicators (5)
(10) Intake vents
(11) Control panel (5)
(12) AC IN (AC inlet) (16)
(13) Exhaust vents
(14) Ports (5)
(15) Security bar (15)
(16) Security slot (15)
(17) Grip (below)
(18) Safety bar (15)

⚠️ WARNING
► Do not open or remove any portion of the product, unless the manuals direct it.
► Do not subject the projector to unstable conditions.
► Do not apply a shock or pressure to this product. Place your hands on the grip on the bottom of the projector when carrying the projector. Remove all the attachments including the power cord and cables, from the projector when carrying the projector.
► Do not look into the lens and the openings on the projector while the lamp is on.

⚠️ CAUTION
► Do not touch around the lamp cover and the exhaust vents during use or just after use, since it is too hot.
► Do not attach anything onto the lens except the lens cover of this projector because it could damage the lens, such as melting the lens.

37. Battery cover (17)
38. Wired remote control port (14)

**NOTE**
- Any button marked with 
  is not supported on this projector (106).
- Each time you press any button (except ID buttons), the ID button of current selected ID number will light (17).
Setting up

Install the projector according to the environment and manner the projector will be used in.

For the case of installation in a special state such as ceiling mount, the specified mounting accessories (Specifications in the User’s Manual (concise)) and service may be required. Before installing the projector, consult your dealer about your installation.

Arrangement

Refer to tables T-1 and T-2 at the back of the User’s Manual (concise) as well as the following to determine the screen size and projection distance. The values shown in the table are calculated for a full size screen.

\[ H \times V \]: Screen size
\[ a \]: Projection distance
  (from the front of the projector unit)
\[ b, c \]: Screen height

(continued on next page)
Arrangement (continued)

⚠️ WARNING ► Install the projector where you can access the power outlet easily. If an abnormality should occur, unplug the projector urgently. Otherwise it could cause a fire or electric shock.

► Do not subject the projector to unstable conditions. If the projector falls or topples over, it could result in injury or damage to the projector and the surrounding things. Using a damaged projector could result in a fire and an electric shock.
- Do not place the projector in unstable places, such as an inclined surface, places subject to vibration, on top of a wobbly table or cart, or a surface that is smaller than the projector.
- Do not put the projector on its side, front or rear position.
- Do not attach nor place anything on the projector unless otherwise specified in the manual.
- Do not use any mounting accessories except the accessories specified by the manufacturer. Read and keep the manuals of the accessories used.
- For special installation such as ceiling mounting, be sure to consult your dealer beforehand.
- Place your hands on the grip on the bottom of the projector when carrying the projector. Remove all the attachments including the power cord and cables, from the projector when carrying the projector.

► Do not install the projector near thermally conductive or flammable things. Such things when heated by the projector could result in a fire and burns.
- Do not place the projector on a metal stand.

► Do not place the projector where any oils, such as cooking or machine oil, are used. Oil may harm the product, resulting in malfunction, or falling from the mounted position.

► Do not place the projector in a place where it may get wet. Getting the projector wet or inserting liquid into the projector could cause a fire and an electric shock, and damage the projector.
- Do not place the projector near water, such as in a bathroom, kitchen, or poolside.
- Do not place the projector outdoors or by the window.
- Do not place anything containing liquid near the projector.

(continued on next page)
Setting up
Arrangement (continued)

⚠️ **CAUTION** ► Place the projector in a cool place with sufficient ventilation. The projector may shutdown automatically or may malfunction if its internal temperature is too high. Using a damaged projector could result in a fire and an electric shock.

- Do not place the projector in direct sunlight or near hot objects such as heaters.
- Do not place the projector where the air from an air conditioner or similar unit will blow on it directly.
- Keep a space of 30 cm or more between a side of the projector and other objects such as walls.
- Do not place the projector on carpet, cushions or bedding.
- Do not stop up, block nor cover the projector's vent holes. Do not place anything around the projector that could be sucked in or stuck to the projector's intake vents.
- Do not place the projector at places that are exposed to magnetic fields, doing so can cause the cooling fans inside the projector to malfunction.

► **Avoid placing the projector in smoky, humid or dusty place.** Placing the projector in such places could cause a fire, an electric shock and malfunction of the projector.

- Do not place the projector near humidifiers. Especially for an ultrasonic humidifier, chlorine and minerals contained in tap water are atomized and could be deposited in the projector causing image degradation or other problems.
- Do not place the projector in a smoking area, kitchen, passageway or by the window.

**NOTICE** • Position the projector to prevent light from directly hitting the projector's remote sensor.

- Do not place the product in a place where radio interference may be caused.
- Set the ALTITUDE of the SERVICE item in the OPTION menu correctly. It is recommended to leave it at AUTO usually. (62) If the projector is used with a wrong setting, it may cause damage to the projector itself or the parts inside.
- Keep heat-sensitive things away from the projector. Otherwise, they may be damaged by the heat from the projector.
Connecting with your devices

Before connecting the projector to a device, consult the manual of the device to confirm that the device is suitable for connecting with this projector and prepare the required accessories, such as a cable in accord with the signal of the device. Consult your dealer when the required accessory did not come with the product or the accessory is damaged.

After making sure that the projector and the devices are turned off, perform the connection, according to the following instructions. Refer to the figures in subsequent pages.

Before connecting the projector to a network system, be sure to read Network Guide too.

⚠️ WARNING ► Use only the appropriate accessories. Otherwise it could cause a fire or damage the projector and devices.
- Use only the accessories specified or recommended by the projector’s manufacturer. It may be regulated under some standard.
- Neither disassemble nor modify the projector and the accessories.
- Do not use the damaged accessory. Be careful not to damage the accessories.

Route a cable so that it is neither stepped on nor pinched out.

⚠️ CAUTION ► For a cable with a core at only one end, connect the end with the core to the projector. That may be required by EMI regulations.

NOTE • Do not turn on or off the projector while connected to a device in operation, unless that is directed in the manual of the device. Otherwise it may cause malfunction in the device or projector.
- The function of some input ports can be selected according to your usage requirements. Check the reference page indicated beside each port in the following illustration.
- Be careful not to mistakenly connect a connector to a wrong port. Otherwise it may cause malfunction in the device or projector.
  - When connecting a connector to a port, make sure that the shape of the connector fits the port.
  - Tighten the screws to connect a connector equipped with screws to a port.
  - Use the cables with straight plugs, not L-shaped ones, as the input ports of the projector are recessed.

About Plug-and-Play capability

• Plug-and-Play is a system composed of a computer, its operating system and peripheral equipment (i.e. display devices). This projector is VESA DDC 2B compatible. Plug-and-Play can be used by connecting this projector to a computer that is VESA DDC (display data channel) compatible.
  - Take advantage of this feature by connecting a computer cable to the COMPUTER IN1 port (DDC 2B compatible). Plug-and-Play may not work properly if any other type of connection is attempted.
  - Please use the standard drivers in your computer as this projector is a Plug-and-Play monitor.

(continued on next page)
Connecting with your devices (continued)

NOTE • Before connecting the projector to a computer, consult the computer’s manual and check the compatibility of the signal level, the synchronization methods and the display resolution output to the projector.
- Some signal may need an adapter to input this projector.
- Some computers have multiple screen display modes that may include some signals which are not supported by this projector.
- Although the projector can display signals with resolution up to UXGA (1600x1200), the signal will be converted to the projector’s panel resolution before being displayed. The best display performance will be achieved if the resolutions of the input signal and the projector panel are identical.
• If you connect this projector and a notebook computer, you need output the display to an external monitor, or output simultaneously to the internal display and an external monitor. Consult the computer's manual for the setting.
• Depending on the input signal, the automatic adjustment function of this projector may take some time and not function correctly.
- Note that a composite sync signal or sync-on-green signal may confuse the automatic adjustment function of this projector (45).
- If the automatic adjustment function does not work correctly, you may not see the dialog to set the display resolution. In such a case, use an external display device. You may be able to see the dialog and set an appropriate display resolution.

(continued on next page)
Connecting with your devices (continued)

**CAUTION**
- Before connecting the projector to a network system be sure to obtain the consent of the administrator of the network.
- Do not connect the LAN port to any network that might have the excessive voltage.
- The designated USB wireless adapter that is sold as an option is required to use the wireless network function of this projector.
- Before removing the USB storage device from the port of the projector, be sure to use the REMOVE USB function on the Thumbnail screen to secure your data (89).
- Do not use any extension cable or device when connecting the adapter to the projector. Before you insert or pull out the USB wireless adapter from the projector, turn off the power of the projector and pull out the power cord’s plug from the outlet. Do not touch the USB wireless adapter while the projector is receiving AC power.
- To connect both the LAN cable and USB device to the projector, use only the further USB TYPE A port from the LAN port or a LAN cable that is flat on the side where the plug’s wire is visible. Otherwise, both of them cannot be connected correctly, or the wire may break (malfunction).

**NOTE**
- If an oversized USB storage device blocks the LAN port, use only the further USB TYPE A port from the LAN port or a USB extension cable to connect the USB storage device.

(continued on next page)
Connecting with your devices (continued)

NOTE • The HDMI ports of this model are compatible with HDCP (High-bandwidth Digital Content Protection) and therefore capable of displaying video signals from HDCP compatible DVD players or the like.

- The HDMI ports support the following signals:
  Video signal: 480i@60, 480p@60, 576i@50, 576p@50, 720p@50/60, 1080i@50/60, 1080p@50/60
  Audio signal: Format Linear PCM
  Sampling frequency 48kHz / 44.1kHz / 32kHz
- This projector can be connected with another equipment that has HDMI™ connector, but with some equipment the projector may not work properly, something like no video.
- Be sure to use an HDMI™ cable that has the HDMI™ logo.
- Use a Category 2-certified HDMI™ cable to input 1080p@50/60 signal to the projector.
- When the projector is connected with a device having DVI connector, use a DVI to HDMI™ cable to connect with the HDMI™ input.
• The HDMI™ cables might come off easily due to the lack of a mechanical lock on the cables and connectors. It is recommended to fasten the cables to the projector to prevent the cables from coming off (14).

(continued on next page)
SETTING UP

Connecting with your devices (continued)

• To use a wired remote control, connect a wired remote control to the REMOTE CONTROL IN port. You can also connect another projector to the REMOTE CONTROL OUT port to control it from the wired remote control. You can utilize this projector as a remote control-relay with the REMOTE CONTROL IN and OUT ports. To connect the wired remote control or another projector to the REMOTE CONTROL IN or OUT ports, use audio cables with 3.5 mm diameter stereo mini plugs. This function is useful when a wireless remote signal may not reliably reach the projector.

NOTE • To use a wired remote control, connect a wired remote control to the REMOTE CONTROL IN port. You can also connect another projector to the REMOTE CONTROL OUT port to control it from the wired remote control. You can utilize this projector as a remote control-relay with the REMOTE CONTROL IN and OUT ports. To connect the wired remote control or another projector to the REMOTE CONTROL IN or OUT ports, use audio cables with 3.5 mm diameter stereo mini plugs. This function is useful when a wireless remote signal may not reliably reach the projector.

Fastening the cables

To get together the signal cables and prevent them from coming off, fasten them to the projector using a commercially available plastic cable tie. Use a cable tie of size 2.0x5.0 mm or smaller. It is recommended to curl the end of the tie slightly before you thread it to the tie holder to enable it to get through easily.

WARNING ► Do not bind the power cord.

CAUTION ► Use only a plastic tie to get together or fasten the cables. A metallic tie may cause damage to the cables and tie holder.
► Do not bind the cables too tightly. The cables or the hole might be damaged.
Fastening the adapter cover

Use the supplied adapter cover to prevent the USB wireless adapter from coming off easily. When using the adapter cover, connect the USB wireless adapter to the further USB TYPE A port from the LAN port.

1. Loosen the screw (marked with triangle) on the bottom left of the USB TYPE A ports.

2. Insert the tab of the cover into the hole at the upper right of the USB TYPE A ports in the direction of the arrow.

3. Align the screw holes on the projector and the cover. Then insert the screw removed from the projector into the hole and tighten the screw.

**WARNING** ▶ Keep small parts away from children and pets. Take care not to put in the mouth.

Using the security bar and slot

A commercially available anti-theft chain or wire can be attached to the security bar on the projector. Refer to the figure to choose an anti-theft chain or wire. Also this product has the security slot for the Kensington lock. For details, see the manual of the security tool.

**WARNING** ▶ Do not use the security bars and slot to prevent the projector from falling down, since it is not designed for it.

**CAUTION** ▶ Do not place anti-theft chain or wire near the exhaust vents. It may become too hot.

**NOTE** • The security bar and slot is not comprehensive theft prevention measures. It is intended to be used as supplemental theft prevention measure.
• The safety bar (4) can be used for the same purpose as the security bar.
**Connecting to a power supply**

1. Put the connector of the power cord into the **AC IN** (AC inlet) of the projector.
2. Firmly plug the power cord’s plug into the outlet. In a couple of seconds after the power supply connection, the **POWER** indicator will light up in steady orange.

Please remember that when the DIRECT POWER ON function activated (page 59), the connection of the power supply make the projector turn on.

⚠️ **WARNING**  ► Do not connect the projector to a power supply while no lens unit is attached to it.

► Please use extra caution when connecting the power cord, as incorrect or faulty connections may result in fire and/or electrical shock.
  • Do not touch the power cord with a wet hand.
  • Only use the power cord that came with the projector. If it is damaged, consult your dealer to get a new one. Never modify the power cord.
  • Only plug the power cord into an outlet whose voltage is matched to the power cord. The power outlet should be close to the projector and easily accessible. Remove the power cord for complete separation.
  • Do not distribute the power supply to multiple devices. Doing so may overload the outlet and connectors, loosen the connection, or result in fire, electric shock or other accidents.
  • Connect the ground terminal for the AC inlet of this unit to the ground terminal of the building using an appropriate power cord (bundled).

**NOTICE**  • This product is also designed for IT power systems with a phase-to-phase voltage of 220 to 240 V.
Remote control

Installing the batteries

Please insert the batteries into the remote control before using it. If the remote control starts to malfunction, try to replace the batteries. If you will not use the remote control for a long period, remove the batteries from the remote control and store them in a safe place.

1. Holding the hook part of the battery cover, remove it.
2. Align and insert the two AA batteries (HITACHI MAXELL or HITACHI MAXELL ENERGY, Part No. LR6 or R6P) according to their plus and minus terminals as indicated in the remote control.
3. Replace the battery cover in the direction of the arrow and snap it back into place.

⚠️ WARNING ⚠️ Always handle the batteries with care and use them only as directed. Improper use may result in battery explosion, cracking or leakage, which could result in fire, injury and/or pollution of the surrounding environment.
- Be sure to use only the batteries specified. Do not use batteries of different types at the same time. Do not mix a new battery with used one.
- Make sure the plus and minus terminals are correctly aligned when loading a battery.
- Keep a battery away from children and pets.
- Do not recharge, short circuit, solder or disassemble a battery.
- Do not place a battery in a fire or water. Keep batteries in a dark, cool and dry place.
- If you observe battery leakage, wipe out the leakage and then replace a battery.
  - If the leakage adheres to your body or clothes, rinse well with water immediately.
- Obey the local laws on disposing the battery.

Using the REMOTE ID function

Utilize this function to control specific projectors by the remote control assigned the same ID number when you use multiple projectors of the same type at the same time.

Assign an ID number to each projector before using the REMOTE ID item in the SERVICE menu of the OPTION menu (64). Press the ID button with the same ID number as assigned to the projector you are going to control. The ID button selected will light for several seconds.

NOTE • Each time you press any button (except ID buttons), the ID button of current selected ID number will light.
• To confirm the projector’s current ID, press any ID button for 3 seconds. Its number will be shown on each screen regardless of set ID of projector.
Changing the frequency of remote control signal

The accessory remote control has the two choices on signal frequency Mode 1:NORMAL and Mode 2:HIGH. If the remote control does not function properly, attempt to change the signal frequency.

In order to set the Mode, please keep pressing the combination of two buttons listed below simultaneously for about 3 seconds.

1. Set to Mode 1:NORMAL
   - AV MUTE and ZOOM - buttons
2. Set to Mode 2:HIGH
   - F5 and KEYSTONE buttons

Please remember that the REMOTE FREQ. in the SERVICE item of the OPTION menu of the projector to be controlled should be set to the same mode as the remote control.

About the remote control signal

The remote control works with the projector’s remote sensor. This projector has two remote sensors on the front and back sides.

The sensors can sense signals within the following range:
- 60 degrees (30 degrees to the left and right of the sensor) within 3 meters about.

NOTE • You can deactivate one of the sensors using the REMOTE RECEIV. item in the SERVICE menu of the OPTION menu.
• The remote control signal reflected in the screen or the like may be available. If it is difficult to send the signal to the sensor directly, attempt to make the signal reflect.
• The remote control uses infrared light to send signals to the projector (Class 1 LED), so be sure to use the remote control in an area free from obstacles that could block the remote control’s signal to the projector.
• The remote control may not work correctly if strong light (such as direct sun light) or light from an extremely close range (such as from an inverter fluorescent lamp) shines on the remote sensor of the projector. Adjust the position of projector avoiding those lights.
Using as a simple PC mouse & keyboard

The accessory remote control works as a simple mouse and keyboard of the computer, when the projector’s **USB TYPE B** port and the computer’s type A USB port are connected and MOUSE is selected for the USB TYPE B item in the **OPTION** menu (60).

1. **PAGE UP key:** Press **PAGE UP** button.
2. **PAGE DOWN key:** Press **PAGE DOWN** button.
3. **Mouse left button:** Press **ENTER** button.
4. **Move pointer:** Use the cursor buttons ▲, ▼, ◄ and ►.
5. **ESC key:** Press **ESC** button.
6. **Mouse right button:** Press **RESET** button.
7. **F5 key:** Press **F5** button.

**NOTICE** ▶ Improper use of the simple mouse & keyboard function could damage your equipment. While using this function, please connect this product only to a computer. Be sure to check your computer’s manuals before connecting this product to the computer.

**NOTE** • When the simple mouse & keyboard function of this product does not work correctly, please check the following.
- When a USB cable connects this projector with a computer having a built-in pointing device (e.g. track ball) like a laptop PC, open BIOS setup menu, then select the external mouse and disable the built-in pointing device, because the built-in pointing device may have priority to this function.
- Windows 95 OSR 2.1 or higher is required for this function. And also this function may not work depending on the computer’s configurations and mouse drivers. This function can work with the computer which can operate general USB mouse or keyboard.
- You cannot do things like press two buttons at once (for instance, pressing two buttons at the same time to move the mouse pointer diagonally).
- This function is activated only when the projector is working properly. This function is not available in any of the following cases:
  - While the lamp is warming up. (The **POWER** indicator blinks in green.)
  - When either **USB TYPE A** or **USB TYPE B** is selected as the input source.
  - While displaying **BLANK** (52), **TEMPLATE** (56) or **MY IMAGE** (77) screen.
  - When any menu is displayed on the screen.
  - While using the cursor buttons to operate the sound or screen functions such as adjusting the sound volume, correcting the keystone, correcting the picture position and magnifying the screen.
Turning on the power

1. Make sure that the power cord is firmly and correctly connected to the projector and the outlet.

2. Make sure that the POWER indicator is lighted in steady orange (107). Then remove the lens cover.

3. Press STANDBY/ON button on the projector or the ON button on the remote control. The projection lamp will light up and POWER indicator will begin blinking in green. When the power is completely on, the indicator will stop blinking and light in steady green (107).

To display the picture, select an input signal according to the section Selecting an input signal (22).

Turning off the power

1. Press the STANDBY/ON button on the projector or the STANDBY button on the remote control. The message “Power off?” will appear on the screen for about 5 seconds.

2. Press the STANDBY/ON or STANDBY button again while the message appears.

   The projector lamp will go off, and the POWER indicator will begin blinking in orange. Then the POWER indicator will stop blinking and light in steady orange when the lamp cooling is complete (107).

3. Attach the lens cover, after the POWER indicator turns to steady orange.

Do not turn the projector on for about 10 minutes or more after turning it off. Also, do not turn the projector off shortly after turning it on. Such operations might cause the lamp to malfunction or shorten the lifetime of some parts including the lamp.

⚠️ WARNING ⚠️ A strong light is emitted when the projector’s power is on. Do not look into the lens of the projector or look inside of the projector through any of the projector’s openings. Do not touch around the lamp cover and the exhaust vents during use or just after use, since it is too hot.

NOTE • Turn the power on/off in right order. Please power on the projector prior to the connected devices.
• This projector has the function that can make the projector automatically turn on/off. Please refer to the DIRECT POWER ON (59) and AUTO POWER OFF (59) items of the OPTION menu.
Operating

Adjusting the volume

1. Use the VOL + / - buttons to adjust the volume. A dialog will appear on the screen to aid you in adjusting the volume. If you do not do anything, the dialog will automatically disappear after a few seconds.

- When ≠ is selected for current picture input port, the volume adjustment is disabled. Please see AUDIO SOURCE item of AUDIO menu (50).
- Even if the projector is in the standby mode, the volume is adjustable when both of the following conditions are true:
  - An option other than ≠ is selected for AUDIO OUT STANDBY in the AUDIO SOURCE item of the AUDIO menu (50).
  - NORMAL is selected in the STANDBY MODE item of the SETUP menu (49).

Temporarily turning off the screen and audio

1. Press AV MUTE button on the remote control. The BLANK screen will be displayed instead of the screen of input signals and the sound from the internal speakers will be muted. Please refer to the BLANK item in SCREEN menu about the BLANK screen (52).

   To exit from the AV MUTE mode and restore the screen and audio, press AV MUTE button again.

- The projector automatically exits from the AV MUTE mode when some control buttons are pressed.

⚠️ CAUTION ⚠️ If you wish to have a blank screen while the projector’s lamp is on, use the AV MUTE function above or the lens shade function (32). Taking any other action may cause the damage on the projector.
Selecting an input signal

1. Press INPUT button on the projector. Each time you press the button, the projector switches its input port from the current port as below.

   **COMPUTER IN1 → COMPUTER IN2 → LAN**
   
   **Up**
   
   **VIDEO**
   
   **S-VIDEO**
   
   **COMPONENT → HDMI 2 → HDMI 1**
   
   **Down**
   
   **USB TYPE A**
   
   **USB TYPE B**

   - If you have set SKIP to some ports from SOURCE SKIP in the OPTION menu, the input from the ports cannot be selected (58).
   - While ON is selected for AUTO SEARCH item in OPTION menu (58), the projector will keep checking the ports in above order repeatedly till an input signal is detected.
   - It may take several seconds to project the images from the USB TYPE B port.

1. Press COMPUTER 1 / 2, LAN, USB TYPE A / B, HDMI 1 / 2, COMPONENT, S-VIDEO or VIDEO button on the remote control. The port corresponding to each button is selected as below.

<table>
<thead>
<tr>
<th>Button</th>

</table>

   - While ON is selected for AUTO SEARCH item in OPTION menu, the projector will keep checking every port sequentially till an input signal is detected (58).
   - It may take several seconds to project the images from the USB TYPE B port.
Selecting an aspect ratio

1. Press **ASPECT** button on the remote control.
   Each time you press the button, the projector switches the mode for aspect ratio in turn.

○ **For a computer signal**
  CP-X8150:
  NORMAL → 4:3 → 16:9 → 16:10
  ------
  CP-WX8240:
  NORMAL → 4:3 → 16:9 → 16:10 → NATIVE

○ **For an HDMI™ signal**
  CP-X8150:
  NORMAL → 4:3 → 16:9 → 16:10 → 14:9
  ------
  CP-WX8240:
  NORMAL → 4:3 → 16:9 → 16:10 → 14:9 → NATIVE

○ **For a video signal, s-video signal or component video signal**
  CP-X8150:
  4:3 → 16:9 → 14:9
  ------
  CP-WX8240:
  4:3 → 16:9 → 16:10 → 14:9 → NATIVE

○ **For an input signal from the LAN, USB TYPE A or USB TYPE B ports, or if there is no signal**
  CP-X8150: 4:3 (fixed)
  CP-WX8240: 16:10 (fixed)

- **ASPECT** button does not work when no proper signal is inputted.
- **NORMAL** mode keeps the original aspect ratio setting.
Adjusting the projector’s elevator

When the place to put the projector is slightly uneven to the left or right, use the elevator feet to place the projector horizontally.

Using the feet can also tilt the projector in order to project at a suitable angle to the screen, elevating the front side of the projector within 9 degrees.

This projector has 2 elevator feet and 2 elevator buttons. An elevator foot is adjustable while pushing the elevator button on the same side as it.

1. Holding the projector, push the elevator buttons to loosen the elevator feet.
2. Position the front side of the projector to the desired height.
3. Release the elevator buttons in order to lock the elevator feet.
4. After making sure that the elevator feet are locked, put the projector down gently.
5. If necessary, the elevator feet can be manually twisted to make more precise adjustments. Hold the projector when twisting the feet.

⚠️ CAUTION  ► Do not handle the elevator buttons without holding the projector, since the projector may drop down.
► Do not tilt the projector other than elevating its front within 9 degrees using the adjuster feet. A tilt of the projector exceeding the restriction could cause malfunction or shortening the lifetime of consumables, or the projector itself.
Adjusting the lens

Adjusting the zoom and focus
The ZOOM or FOCUS dialog will appear when you press any of the buttons from ZOOM, ZOOM -, ZOOM +, FOCUS + and FOCUS -.

1. Use the ZOOM + / - buttons on the remote control or ZOOM button and ◄/► cursor buttons on the projector to adjust the screen size.
2. Use the FOCUS + / - buttons to focus the picture.

NOTE • The projector may ignore operation by other buttons while the lens is moving.

Adjusting the lens position
Press the LENS SHIFT button. The LENS SHIFT dialog will appear. Using the ▲/▼/◄/► buttons while the dialog is displayed shifts the lens. Generally, better image quality can be got when the lens is set to the center.
Press the LENS SHIFT button again to exit the LENS SHIFT function.

CENTERING
Press the ENTER or INPUT button while the dialog is displayed to execute the CENTERING feature, which adjusts the lens to the center. A message dialog is displayed for confirmation. Pressing the ► button performs CENTERING. You can also perform CENTERING in the standby mode by pressing the FUNCTION and LENS SHIFT buttons on the control panel for 3 seconds at the same time.

⚠️ CAUTION ⚠️ Do not put your fingers or any other things around the lens. The moving lens could catch them in the space around the lens and result in an injury.

NOTE • While the lens is moving to the center, the menu will disappear and an hourglass icon will appear on the screen. CENTERING may take some time till the lens reaches the center.
• The projector may ignore operation by buttons while moving the lens.
• The CENTERING feature while the projector is in the standby mode is disabled if the STANDBY MODE item of SETUP menu is set to SAVING. Perform CENTERING before the projector's power is turned off, or set the STANDBY MODE to NORMAL.
• The adjustable range of LENS SHIFT varies depending on the lens unit mounted on the projector to maintain picture quality. Therefore LENS SHIFT adjustment may not reach the end of the indicator in the dialog, and that is not a failure.
Adjusting the lens (continued)

Lens memory

This projector is equipped with memory functions for the lens adjustments (LENS SHIFT and LENS TYPE). Up to 3 sets of adjustments can be stored.

To utilize the lens memory feature, press the POSITION or FUNCTION button while the LENS SHIFT dialog is displayed. Then the LENS MEMORY dialog will appear. The current lens adjustments are displayed on the “CURRENT” line. The adjustments already stored in the lens memory are displayed on the lines of SAVE and LOAD-1 to 3.

SAVE:
To store the current lens adjustments, select one of the "SAVE" options numbered 1 to 3 (number of the lens memory) and press the ► or ENTER button. Remember that the current data being stored of a memory will be lost by saving new data into the memory.

LOAD:
To recall stored adjustments, select one of the "LOAD" options numbered 1 to 3 (number of the lens memory) and press the ► or ENTER button. Remember that the current adjusted condition will be lost by loading data. If you want to keep the current adjustment, please save it before performing a LOAD function.

CLEAR LENS MEMORY:
To clear the adjustment stored in a lens memory, select CLEAR LENS MEMORY and press the ► or ENTER button. The CLEAR LENS MEMORY dialog will be displayed. Select the number of the lens memory to be cleared using the ▲/▼ buttons and press the ► button. A message dialog is displayed for confirmation. Press the ► button again to clear the lens memory.

NOTE • The projector may ignore operation by buttons while moving the lens. • You can perform the LOAD function using LENS MEMORY button.
Using the automatic adjustment feature

1. Press AUTO button on the remote control. Pressing this button performs the following.
   ○ For a computer signal
     The vertical position, the horizontal position and the horizontal phase will be automatically adjusted.
     Make sure that the application window is set to its maximum size prior to attempting to use this feature. A dark picture may still be incorrectly adjusted. Use a bright picture when adjusting.
   ○ For a video signal and s-video signal
     The video format best suited for the respective input signal will be selected automatically. This function is available only when the AUTO is selected for the VIDEO FORMAT item in the INPUT menu (44). The vertical position and horizontal position will be automatically set to the default.
   ○ For a component video signal
     The vertical position and horizontal position will be automatically set to the default. The horizontal phase will be automatically adjusted.

- The automatic adjustment operation requires approx. 10 seconds. Also please note that it may not function correctly with some input.
- When this function is performed for a video signal, a certain extra such as a line may appear outside a picture.
- When this function is performed for a computer signal, a black frame may be displayed on the edge of the screen, depending on the computer model.
- The items adjusted by this function may vary when the FINE or DISABLE is selected for the AUTO ADJUST item of the SERVICE item in the OPTION menu (62).

Adjusting the position

1. Press POSITION button on the remote control when no menu is indicated. The “POSITION” indication will appear on the screen.

2. Use the ▲/▼/◄/► cursor buttons to adjust the picture position.
   When you want to reset the operation, press RESET button on the remote control during the operation.
   To complete this operation, press POSITION button again. Even if you do not do anything, the dialog will automatically disappear after a few seconds.

- When this function is performed on a video signal or an s-video signal, some image such as an extra-line may appear at outside of the picture.
- When this function is performed on a video signal or s-video signal, the range of this adjustment depends on OVER SCAN in IMAGE menu (41) setting. It is not possible to adjust when OVER SCAN is set to 10.
- If POSITION button is pressed when a menu is indicated on screen, the displayed picture does not move its position but the menu does.
- This function is unavailable for a signal from the LAN, USB TYPE A / B or HDMI 1 / 2 port.
Correcting the distortion

To correct the distortion of projected screen, you can select one of three options, AUTO, MANUAL and PERFECT FIT. First press the KEYSTONE button to display the KEYSTONE menu, and point at one of the menu items with the ▲/▼ buttons.

AUTO: performs the automatic vertical keystone correction. (47)

MANUAL: allows you to adjust the vertical and horizontal keystone.

PERFECT FIT: allows you to adjust each of the screen corners and sides to correct the distortion.

Then follow the procedure shown below for the item you selected.

NOTE • The menu or dialog will automatically disappear after several seconds of inactivity. Press the KEYSTONE button again, or point the cursor at EXIT in the dialog and press the ► or ENTER button to end the operation and close the menu or dialog.

• When the screen is adjusted by PERFECT FIT, neither AUTO nor MANUAL is selectable. If you wish to use these functions, refer to step 3 in the PERFECT FIT item to initialize the adjustment of PERFECT FIT.

• When TRANSITION DETECTOR is ON, these functions are not available (83).

AUTO:

When AUTO is pointed at, pressing the ► or ENTER button performs automatic vertical keystone correction.

NOTE • When the projector is in one of the following conditions, the automatic vertical keystone correction feature may not work correctly or at all.

- REAR / CEILING or FRONT / CEILING is selected for the INSTALLATION item in the SETUP menu, and the projector screen is slanted or tilted downwards.

- The ZOOM adjustment is not set to the full WIDE (wide-angle focus).

- The projector is nearly horizontal (about ±4°).

- The projector is inclined at about ±35 degrees or over.

• When the vertical lens shift is not set fully upward, this function may not work well.
Correcting the distortion (continued)

○ MANUAL:
  When MANUAL is pointed at, pressing the ► or ENTER button displays the KEYSTONE_MANUAL dialog.
  1. Select the vertical or horizontal keystone (▲/▼) with the ▲/▼ buttons.
  2. Use the ◄/► buttons to adjust the keystone distortion.

NOTE • When the zoom adjustment is set to the TELE (telephoto focus), this function may be excessive. This function should be used when the zoom adjustment is set to the full WIDE (wide-angle focus) whenever possible.
• When the vertical lens shift is not set fully upward, this function may not work well.
• Point at RETURN in the dialog with the ▲/▼ buttons and press ◄ or ENTER button to return to the KEYSTONE menu.

○ PERFECT FIT:
  When PERFECT FIT is pointed at, pressing the ► or ENTER button displays the KEYSTONE_PERFECT FIT dialog.
  This projector is equipped with a test pattern for PERFECT FIT. Select the test pattern icon shown in the lower left of the dialog with the ◄/▼ buttons. When you press the ENTER or INPUT button, the test pattern appears or disappears.
  1. If it is necessary to initialize the current adjustment, point at RESET in the dialog with the RESET button, and press the ENTER or INPUT button.
  2. Select one of the corners or sides to be adjusted with the ▲/▼/◄/► buttons and press the ENTER or INPUT button.

(continued on next page)
Correcting the distortion (continued)

3. Adjust the selected part as below.
   - For adjusting a corner, use the ▲/▼/◄/► buttons to adjust the position of the corner.
   - For adjusting the upper or lower side, use the ◄/► buttons to select any one point on the side, and use the ▲/▼ buttons to adjust the distortion of the side.
   - For adjusting the left or right side, use the ▲/▼ buttons to select any one point on the side, and use the ◄/► buttons to adjust the distortion of the side.
   - To adjust another corner or side, press the ENTER or INPUT button and follow the procedure from step 2.

4. This projector is equipped with a memory feature for PERFECT FIT adjustment. Up to 3 sets of adjustments can be stored.
   - **SAVE:**
     To store the current PERFECT FIT adjustment, select one of the SAVE icons numbered 1 to 3 (number of the memory) with the ◄/▲/▼ buttons and press the ENTER or INPUT button. Remember that the current data being stored of a memory will be lost by saving new data into the memory.
   - **LOAD:**
     To recall stored adjustments, select one of the LOAD icons numbered 1 to 3 (number of the memory) with the ◄/▲/▼ buttons and press the ENTER or INPUT button. Remember that the current adjusted condition will be lost by loading data. If you want to keep the current adjustment, please save it before performing a LOAD function.

**NOTE**
- Each corner and side can be adjusted individually but in some cases it may be adjusted in conjunction with another corner or side. This is due to control restrictions and not a malfunction.
- The LOAD functions whose linked memory has no data are skipped.
- There may be some noise and the screen may flicker for a moment when loading data. This is not malfunction.
- Point at RETURN in the dialog with the ▲/▼ buttons and press the ◄ or ENTER button to return to the KEYSTONE menu.
Using the magnify feature

1. Press the MAGNIFY ON button on the remote control.
   The picture will be magnified, and the MAGNIFY dialog will appear on the screen. When the MAGNIFY ON button is pressed for the first time after the projector is turned on, the picture will be zoomed by 1.5 times. On the dialog, triangle marks to show each direction will be displayed.

2. The display magnification of the projector switches in order with every press of the MAGNIFY ON button.
   - For computer signals, HDMI™ (RGB) signals, input signals from the LAN, USB TYPE A or USB TYPE B ports
     1.5 times → 2 times → 3 times → 4 times → 1 time
   - For video signals, s-video signals, component video signals or HDMI™ (Component) signals
     1.5 times → 2 times → 1 time

3. While the triangles are displayed on the dialog, use the ▲/▼/◄/► cursor buttons to shift the magnifying area.

4. Press the MAGNIFY OFF button on the remote control to exit magnification.

   - The MAGNIFY dialog will automatically disappear in several seconds with no operation. The dialog will appear again if the MAGNIFY ON button is pressed when the dialog has automatically disappeared.
   - The magnification is automatically disabled when the displaying signal or its display condition is changed.
   - While the magnification is active, the keystone distortion condition may vary. It will be restored when the magnification is disabled.
   - Some horizontal stripes might be visible on the image while magnification is active.
   - This function is not available in the following cases:
     - A sync signal in the range not supported is input.
     - There is no input signal.
**Temporarily freezing the screen**

1. Press the FREEZE button on the remote control. The “FREEZE” indication will appear on the screen (however, the indication will not appear when the OFF is selected for the MESSAGE item in the SCREEN menu (54), and the projector will go into the FREEZE mode, which the picture is frozen.
   To exit the FREEZE mode and restore the screen to normal, press the FREEZE button again.

- The projector automatically exits from the FREEZE mode when some control buttons are pressed.
- If the projector continues projecting a still image for a long time, the LCD panel might possibly be burned in. Do not leave the projector in the FREEZE mode for too long.
- Images might appear degraded when this function is operated, but it is not a malfunction.

**Temporarily shading the screen**

1. Press the SHADE button on the control panel. The mechanical lens shade closes and the screen turns to black. The SHADE indicator on the projector blinks in yellow while the shade is closed.
   To open the shade and restore the screen, press the SHADE button again.

⚠️ **CAUTION** ► If you wish to have a blank screen while the projector’s lamp is on, use the lens shade function above or the AV MUTE function (21). Taking any other action may cause the damage on the projector.

**NOTE** • The projector will turn off automatically when the time set up by the SHADE TIMER passes (59).
  • When turning off the power by the normal procedure, the lens shade opens automatically. If AC power supply is disconnected while opening or closing the lens shade, the moving of the lens shade stops. However, the next time the projector is turned on, the lens shade opens again automatically.
Using the menu function

This projector has the following menus: PICTURE, IMAGE, INPUT, SETUP, AUDIO, SCREEN, OPTION, NETWORK, SECURITY and EASY MENU. EASY MENU consists of functions often used, and the other menus are classified into each purpose and brought together as the ADVANCED MENU. Each of these menus is operated using the same methods. While the projector is displaying any menu, the MENU button on the projector works as the cursor buttons. The basic operations of these menus are as follows.

1. To start the MENU, press the MENU button. The MENU you last used (EASY or ADVANCED) will appear. EASY MENU has priority to appear just after powered on.

2. In the EASY MENU
   (1) Use the ▲/▼ cursor buttons to select an item to operate. If you want to change it to the ADVANCED MENU, select the ADVANCED MENU.
   (2) Use the ◄/► cursor buttons to operate the item.

In the ADVANCED MENU
   (1) Use the ▲/▼ cursor buttons to select a menu. If you want to change it to the EASY MENU, select the EASY MENU.
      The items in the menu appear on the right side.
   (2) Press the ► cursor button or ENTER button to move the cursor to the right side. Then use the ▲/▼ cursor buttons to select an item to operate and press the ► cursor button or ENTER button to progress. The operation menu or dialog of the selected item will appear.
   (3) Use the buttons as instructed in the OSD to operate the item.

(continued on next page)
Using the menu function (continued)

3. To close the MENU, press the MENU button again or select EXIT and press the ◄ cursor button or ENTER button. Even if you do not do anything, the dialog will automatically disappear after about 30 seconds.

- If you want to move the menu position, use the cursor buttons after pressing the POSITION button.
- Some functions cannot be performed when a certain input port is selected, or when a certain input signal is displayed.
- When you want to reset the operation, press RESET button on the remote control during the operation. Note that some items (ex. LANGUAGE, VOLUME) cannot be reset.
- In the ADVANCED MENU, when you want to return to the previous display, press the ◄ cursor button or ESC button on the remote control.

Indication in OSD (On Screen Display)

The meanings of the general words on the OSD are as follows.

<table>
<thead>
<tr>
<th>Indication</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>EXIT</td>
<td>Selecting this word finishes the OSD menu. It's the same as pressing the MENU button.</td>
</tr>
<tr>
<td>RETURN</td>
<td>Selecting this word returns the menu to the previous menu.</td>
</tr>
<tr>
<td>CANCEL or NO</td>
<td>Selecting this word cancels the operation in the present menu and returns to the previous menu.</td>
</tr>
<tr>
<td>OK or YES</td>
<td>Selecting this word executes the prepared function or shifts the menu to the next menu.</td>
</tr>
</tbody>
</table>
From the EASY MENU, items shown in the table below can be performed. Select an item using the ▲/▼ cursor buttons. Then perform it according to the following table.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**To adjust CUSTOM**

Selecting a mode whose name includes CUSTOM and then pressing the ► button or the ENTER button displays a dialog to aid you in adjusting the mode. This function is useful when you want to change the brightness of particular tones.

Choose an item using the ◄/► buttons, and adjust the level using the ▲/▼ buttons.

You can display a test pattern for checking the effect of your adjustment by pressing the ENTER button. Each time you press the ENTER button, the pattern changes as below.

- No pattern ⇒ Gray scale of 9 steps
- Ramp ⇒ Gray scale of 15 steps

The eight equalizing bars correspond to eight tone levels of the test pattern (Gray scale of 9 steps) except the darkest in the left end. If you want to adjust the 2nd tone from left end on the test pattern, use the equalizing adjustment bar “1”. The darkest tone at the left end of the test pattern cannot be controlled with any of equalizing adjustment bar.

- Lines or other noise might appear on the screen when this function is operated, but it is not a malfunction.

</tr>
</tbody>
</table>

#### To adjust CUSTOM

Selecting a mode whose name includes CUSTOM and then pressing the ► button or the ENTER button displays a dialog to aid you in adjusting the OFFSET and GAIN of the selected mode.

OFFSET adjustments change the color intensity on the whole tones of the test pattern.

GAIN adjustments mainly affect color intensity on the brighter tones of the test pattern.

Choose an item using the ◄/► buttons, and adjust the level using the ▲/▼ buttons.

You can display a test pattern for checking the effect of your adjustment by pressing the ENTER button.

Each time you press the ENTER button, the pattern changes as below.

- No pattern ⇔ Gray scale of 9 steps  ⇔
- Ramp ⇔ Gray scale of 15 steps

- Lines or other noise might appear on the screen when this function is operated, but it is not a malfunction.

### COLOR

Using the ◄/► buttons adjusts the strength of whole color.

- Weak ⇔ Strong

- This item can be selected only for a video, s-video and component video signal.

- For an HDMI™ signal, this item can also be selected if either (1) or (2) applies.

  1. HDMI FORMAT item in the INPUT menu for selected port is set to VIDEO.
  2. HDMI FORMAT item in the INPUT menu for selected port is set to AUTO, and the projector recognizes that it receives video signals.

### TINT

Using the ◄/► buttons adjusts the tint.

- Reddish ⇔ Greenish

- This item can be selected only for a video, s-video and component video signal.

- For an HDMI™ signal, this item can also be selected if either (1) or (2) applies.

  1. HDMI FORMAT item in the INPUT menu for selected port is set to VIDEO.
  2. HDMI FORMAT item in the INPUT menu for selected port is set to AUTO, and the projector recognizes that it receives video signals.

</table>
| **OVER SCAN**| Using the ◄/► buttons adjusts the over-scan ratio.  
Small (It magnifies picture) ⇔ Large (It reduces picture)  
- This item can be selected only for a video, s-video and component video signal.  
- For an HDMI™ signal, this item can also be selected if either (1) or (2) applies.  
(1) HDMI FORMAT item in the INPUT menu for selected port is set to VIDEO.  
(2) HDMI FORMAT item in the INPUT menu for selected port is set to AUTO, and the projector recognizes that it receives video signals. |
| **V POSITION**| Using the ◄/► buttons adjusts the vertical position.  
Down ⇔ Up  
- Over-adjusting the vertical position may cause noise to appear on the screen. If this occurs, please reset the vertical position to the default setting. Pressing the RESET button when the V POSITION is selected will reset the V POSITION to the default setting.  
- When this function is performed on a video signal or an s-video signal, the range of this adjustment depends on OVER SCAN (above) setting. It is not possible to adjust when OVER SCAN is set to 10.  
- This function is unavailable for a signal from the **LAN, USB TYPE A / B** or **HDMI 1 / 2** port. |
| **H POSITION**| Using the ◄/► buttons adjusts the horizontal position.  
Right ⇔ Left  
- Over-adjusting the horizontal position may cause noise to appear on the screen. If this occurs, please reset the horizontal position to the default setting. Pressing the RESET button when the H POSITION is selected will reset the H POSITION to the default setting.  
- When this function is performed on a video signal or an s-video signal, the range of this adjustment depends on OVER SCAN (above) setting. It is not possible to adjust when OVER SCAN is set to 10.  
- This function is unavailable for a signal from the **LAN, USB TYPE A / B** or **HDMI 1 / 2** port. |

<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| **H PHASE**      | Using the ◄/► buttons adjusts the horizontal phase to eliminate flicker. Right ⇔ Left  
• This item can be selected only for a computer signal or a component video signal. This function is unavailable for a signal from the **LAN, USB TYPE A / B** or **HDMI 1 / 2** port. |
| **H SIZE**       | Using the ◄/► buttons adjusts the horizontal size.  
• When this adjustment is excessive, the picture may not be displayed correctly. In such a case, please reset the adjustment by pressing the **RESET** button on the remote control during this operation.  
• Images might appear degraded when this function is operated, but it is not a malfunction. |
| **AUTO ADJUST EXECUTE** | Selecting this item performs the automatic adjustment feature.  
**For a computer signal**  
The vertical position, the horizontal position and the horizontal phase will be automatically adjusted. Make sure that the application window is set to its maximum size prior to attempting to use this feature. A dark picture may still be incorrectly adjusted. Use a bright picture when adjusting.  
**For a video signal and s-video signal**  
The video format best suited for the respective input signal will be selected automatically. This function is available only when the AUTO is selected for the **VIDEO FORMAT** item in the **INPUT** menu (44). The vertical position and horizontal position will be automatically set to the default.  
**For a component video signal**  
The vertical position and horizontal position will be automatically set to the default. The horizontal phase will be automatically adjusted.  
• The automatic adjustment operation requires approx. 10 seconds. Also please note that it may not function correctly with some input.  
• When this function is performed for a video signal, a certain extra such as a line may appear outside a picture.  
• When this function is performed for a computer signal, a black frame may be displayed on the edge of the screen, depending on the computer model.  
• The items adjusted by this function may vary when the FINE or **DISABLE** is selected for the **AUTO ADJUST** item of the **SERVICE** item in the **OPTION** menu (62). |
From the INPUT menu, items shown in the table below can be performed. Select an item using the ▲/▼ cursor buttons, and press the ► cursor button or ENTER button to execute the item. Then perform it according to the following table.

## INPUT menu

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| **COMPUTER IN** | The computer input signal type for **COMPUTER IN1** and **IN2** ports can be set.  
   (1) Use the ▲/▼ buttons to select the **COMPUTER IN** port to be set.  
   (2) Use the ◄/► buttons to select the computer input signal type.  
   **AUTO **\(\Rightarrow\) **SYNC ON G OFF**  
   • Selecting the AUTO mode allows you to input a sync on G signal or component video signal from the port.  
   • In the AUTO mode, the picture may be distorted with certain input signals. In such a case, remove the signal connector so that no signal is received and select the **SYNC ON G OFF**, and then reconnect the signal. |
| **FRAME LOCK** | Set the frame lock function on/off for each port.  
   (1) Use the ▲/▼ buttons to select the input ports.  
   (2) Use the ◄/► buttons to turn the frame lock function on/off.  
   **ON **\(\Rightarrow\) **OFF**  
   • This item can be performed only on a signal with a vertical frequency of 49 to 51Hz, 59 to 61 Hz.  
   • When **ON** is selected, moving pictures are displayed more smoothly. |

(continued on next page)
### RESOLUTION

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>The resolution for the <strong>COMPUTER IN1</strong> and <strong>COMPUTER IN2</strong> input signals can be set on this projector. (1) In the INPUT menu select the RESOLUTION using the ▲/▼ buttons and press the ► button. The RESOLUTION menu will be displayed. (2) In the RESOLUTION menu select the resolution you wish to display using the ▲/▼ buttons. Selecting AUTO will set a resolution appropriate to the input signal. (3) Pressing the ► or ENTER button when selecting a STANDARD resolution will automatically adjust the horizontal and vertical positions, clock phase and horizontal size. The INPUT_INFORMATION dialog will be displayed. (4) To set a custom resolution use the ▲/▼ buttons to select the CUSTOM and the RESOLUTION_CUSTOM box will be displayed. Set the horizontal (HORZ) and vertical (VERT) resolutions using the ▲/▼/◄/► buttons. This function may not support all resolutions. (5) Move the cursor to OK on screen and press the ► or ENTER button. The message “ARE YOU SURE YOU WISH TO CHANGE RESOLUTION?” appears. To save the setting, press the ► button. The horizontal and vertical positions, clock phase and horizontal size will be automatically adjusted. The INPUT_INFORMATION dialog will be displayed. (6) To revert back to the previous resolution without saving changes, move the cursor to CANCEL on screen and press the ◄ or ENTER button. The screen will then return to the RESOLUTION menu displaying the previous resolution. • For some pictures, this function may not work well.</td>
<td></td>
</tr>
</tbody>
</table>
From the SETUP menu, items shown in the table below can be performed. Select an item using the ▲/▼ cursor buttons, and press the ► cursor button or ENTER button to execute the item. Then perform it according to the following table.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| AUTO KEYSTONE | Selecting this item performs the Automatic keystone distortion correction. Projector automatically corrects vertical keystone distortion due to the (forward/backward) setup angle by itself. This function will be executed only once when selected in the menu. When the slant of the projector is changed, execute this function again.  
  • The adjustable range of this function will vary among inputs. For some input, this function may not work well.  
  • When the projector is in one of the following conditions, the automatic vertical keystone correction feature may not work correctly or at all.  
  - REAR / CEILING or FRONT / CEILING is selected for the INSTALLATION item in the SETUP menu, and the projector screen is slanted or tilted downwards.  
  - The ZOOM adjustment is not set to the full WIDE (wide-angle focus).  
  - The projector is nearly horizontal (about ±4°).  
  - The projector is inclined at about ±35 degrees or over.  
  • When the vertical lens shift is not set fully upward, this function may not work well.  
  • This function is unavailable when the TRANSITION DETECTOR (83) is ON or the screen is adjusted by PERFECT FIT (29, 30). |
| KEYSTONE   | Using the ◄/► buttons corrects the vertical keystone distortion.  
  Shrink the bottom of the image ⇔ Shrink the top of the image  
  • The adjustable range of this function will vary among inputs. For some input, this function may not work well.  
  • When the zoom adjustment is set to the TELE (telephoto focus), this function may be excessive. This function should be used when the zoom adjustment is set to the full WIDE (wide-angle focus) whenever possible.  
  • When the vertical lens shift is not set fully upward, this function may not work well  
  • This function is unavailable when the TRANSITION DETECTOR (83) is ON or the screen is adjusted by PERFECT FIT (29, 30). |

| MyScreen | This item allows you to capture an image for use as a MyScreen image which can be used as the BLANK screen and START UP screen. Display the image you want to capture before executing the following procedure.  
1. Selecting this item displays a dialog titled “MyScreen”. It will ask you if you start capturing an image from the current screen. Please wait for the target image to be displayed, and press the ENTER or INPUT button when the image is displayed. The image will freeze and the frame for capturing will appear. To stop performing, press the RESET button on the remote control.  
2. Using the ▲/▼/◄/► buttons adjusts the frame position. Please move the frame to the position of the image which you want to use. The frame may not be able to be moved for some input signals. To start registration, press the ENTER or INPUT button on the remote control. To restore the screen and return to the previous dialog, press the RESET button on the remote control. Registration may take several minutes. When the registration is completed, the registered screen and the following message is displayed for several seconds: “MyScreen registration is finished.” If the registration failed, the following message is displayed: “A capturing error has occurred. Please try again.”  
- This function cannot be selected when the ON is selected to the MyScreen Lock item (54).  
- This function cannot be selected when the ON is selected to the MyScreen PASSWORD item in SECURITY menu (81).  
- This function is unavailable for a signal from the LAN, USB TYPE A / B or HDMI 1 / 2 port. |

| SOURCE NAME  | Each input port for this projector can have a name applied to it.  
(1) Use the ▲/▼ buttons on the SCREEN menu to select SOURCE NAME and press the ► or ENTER button. The SOURCE NAME menu will be displayed.  
(2) Use the ▲/▼ buttons on the SOURCE NAME menu to select the port to be named and press the ► button. The SOURCE NAME dialog will be displayed. Right side of the menu is blank until a name is specified.  
(3) Select an icon you would like to assign to the port in the SOURCE NAME dialog. The name assigned to the port will also be automatically switched according to your icon selection. Press the ENTER or INPUT button to determine your icon selection.  
(4) Select a number you would like to assign to the port along with the icon. You can select the number either from blank (no number assigned), 1, 2, 3, or 4. Then press the ENTER or INPUT button.  
(5) If you would like to modify the name assigned to the port, select CUSTOM NAME and press the ENTER or INPUT button. |

</table>
| **SOURCE NAME**  
(continued) | (6) The current name will be displayed on the first line. Use the ▲/▼/◄/► buttons and the ENTER or INPUT button to select and enter characters. To erase 1 character at one time, press the RESET button or press the ◄ and INPUT button at the same time. Also if you move the cursor to DELETE or ALL CLEAR on screen and press the ENTER or INPUT button, 1 character or all characters will be erased. The name can be a maximum of 16 characters.  
(7) To change an already inserted character, press the ▲ button to move the cursor to the first line, and use the ◄/► buttons to move the cursor on the character to be changed.  
After pressing the ENTER or INPUT button, the character is selected. Then, follow the same procedure as described at the item (6) above.  
(8) To finish entering text, move the cursor to the OK on screen and press the ►, ENTER or INPUT button. To revert to the previous name without saving changes, move the cursor to the CANCEL on screen and press the ◄, ENTER or INPUT button. |
| **TEMPLATE**  | Using the ▲/▼ cursor buttons switches the mode for the template screen.  
Press the ► cursor (or the ENTER) button to display the selected template, and press the ◄ cursor button to close the displayed screen.  
The last selected template is displayed when the MY BUTTON allocated to the TEMPLATE function is pressed (61).  
TEST PATTERN ⇔ DOT-LINE1 ⇔ DOT-LINE2 ⇔ DOT-LINE3  
 STACK ⇔ MAP2 ⇔ MAP1 ⇔ CIRCLE2 ⇔ CIRCLE1 ⇔ DOT-LINE4  
You can turn a map upside down and scroll it horizontally when MAP1 or MAP2 is selected. To invert or scroll the map, display the guidance by pressing the RESET button on the remote three seconds or more when MAP1 or MAP2 appears. |

</tr>
</thead>
<tbody>
<tr>
<td>The C.C. is the function that displays a transcript or dialog of the audio portion of a video, files or other presentation or other relevant sounds. It is required to have NTSC format video or 480i@60 format component video source supporting C.C. feature to utilize this function. It may not work properly, depending on equipment or signal source. In this case, please turn off the Closed Caption.</td>
<td></td>
</tr>
</tbody>
</table>

**DISPLAY**
Select Closed Caption DISPLAY setting from following options using ▲/▼ buttons.

- **AUTO**
- **ON**
- **OFF**

- **AUTO**: Closed Caption automatically appears when the input signal (C.C. compatible) from the port with the mute icon set at AUDIO SOURCE is selected.
- **ON**: Closed Caption is on.
- **OFF**: Closed Caption is off.

- The caption is not displayed when the OSD menu is active.
- The Closed Caption is the function to display the dialogue, narration, and / or sound effects of a television program or other video sources. The Closed Caption availability is depending upon broadcaster and/or content.

**MODE**
Select Closed Caption MODE setting from following options using ▲/▼ buttons.

- **CAPTIONS**
- **TEXT**

- **CAPTIONS**: Display Closed Caption.
- **TEXT**: Display Text data, which is for additional information such as news reports or a TV program guide. The information covers the entire screen. Not all of the C.C. program has Text information.

**CHANNEL**
Select Closed Caption CHANNEL from following options using ▲/▼ buttons.

- **1**
- **2**
- **3**
- **4**

- **1**: Channel 1, primary channel / language
- **2**: Channel 2
- **3**: Channel 3
- **4**: Channel 4

The channel data may vary, depending on the content. Some channel might be used for secondary language or empty.
From the OPTION menu, items shown in the table below can be performed. Select an item using the ▲/▼ cursor buttons, and press the ► cursor button or ENTER button to execute the item, except for the items LAMP TIME and FILTER TIME. Then perform it according to the following table.

<td><strong>USB TYPE B</strong></td>
<td></td>
</tr>
</tbody>
</table>
Using the ▲/▼ buttons selects the function of USB TYPE B port. To use this function, you need to connect the USB TYPE B port of the projector and the type A USB port of a computer.  
MOUSE ⇔ USB DISPLAY  
MOUSE: The accessory remote control works as the simple mouse and keyboard of the computer.  
USB DISPLAY: The port works as an input port that receives image signals from the computer (96).  
- It may take several seconds to project the images from the USB TYPE B port.  
- In the following cases, a message to notify you that USB TYPE B port is not available for picture input appears together with the USB TYPE B dialog:  
- This setting is switched to MOUSE while a picture input from the USB TYPE B port is projected.  
- The USB TYPE B port is selected as the picture input source while this setting is set to MOUSE. Select USB DISPLAY in the dialog to project the picture input to the USB TYPE B port. In this case, you cannot use the simple mouse and keyboard function. Otherwise select other port for picture input. |
| **LAMP TIME**  | The lamp time is the usage time of the lamp, counted after the last resetting. It is shown in the OPTION menu.  
Pressing the RESET button on the remote control or the ► button of the projector displays a dialog.  
To reset the lamp time, select the OK using the ► button.  
CANCEL ⇔ OK  
- Please reset the lamp time only when you have replaced the lamp, for a suitable indication about the lamp.  
- For the lamp replacement, see the section Replacing the lamp (100). |
| **FILTER TIME** | The filter time is the usage time of the air filter, counted after the last resetting. It is shown in the OPTION menu.  
Pressing the RESET button on the remote control or the ► button of the projector displays a dialog.  
To reset the filter time, select the OK using the ► button.  
CANCEL ⇔ OK  
- Please reset the filter time only when you have cleaned or replaced the air filter, for a suitable indication about the air filter.  
- For the air filter cleaning, see the section Cleaning and replacing the air filter (102). |

</table>

**ALTITUDE**

Using the ▲/▼ buttons switches the rotation speed of the cooling fans. It is recommended to leave it at AUTO usually.

- **HIGH-2** ➔ **HIGH-1** ➔ **NORMAL** ➔ **AUTO**

  - **AUTO**: The projector changes the rotation speed automatically to suit the altitude and other environmental factors. Choose an option below when there is a trouble with the AUTO mode.
  - **NORMAL**: This mode can be used below 1600m (5250ft.).
  - **HIGH-1**: This mode can be used between 1600 to 2300m (5250 to 7550ft.).
  - **HIGH-2**: This mode can be used above 2300m (7550ft.).

**AUTO ADJUST**

Using the ▲/▼ buttons to select one of the mode. When the DISABLE is selected, the automatic adjustment feature is disabled.

- **FINE** ➔ **FAST** ➔ **DISABLE**

  - **FINE**: Finer tuning including H.SIZE adjustment.
  - **FAST**: Faster tuning, setting H.SIZE to prearranged data for the input signal.

- Depending on conditions, such as input image, signal cable to the projector, environment around the projector, etc., the automatic adjustment may not work correctly. In such a case, please choose DISABLE to disable the automatic adjustment, and make adjustment manually.

**GHOST**

Adjust the settings using the ▲/▼ buttons to eliminate ghosting.

### OPTION menu

#### Item | Description
--- | ---

**KEY LOCK**

(1) Use the ▲/▼ buttons to choose the operations control.

CONTROL PANEL ⇔ REMOTE CONTROL

(2) Use the ◄/► buttons to select ON or OFF.

ON ⇔ OFF

Selecting ON in Step 2 locks the buttons except STANDBY, ON and STANDBY/ON on the operations control selected in Step 1. Selecting OFF releases the locked buttons on the operations control selected in Step 1.

- Please use this function to prevent tampering or accidental operation.
- It’s not possible to disable both options at the same time.

**REMOTE RECEIV.**

(1) Select a remote sensor using the ▲/▼ button.

FRONT ⇔ REAR

(2) Switch it using the ◄/► button.

ON ⇔ OFF

- When one sensor is turned off, the other cannot be turned off too.

**REMOTE FREQ.**

(1) Use the ▲/▼ button to change the projector’s remote sensor frequency setting (4, 18).

1:NORMAL ⇔ 2:HIGH

(2) Use the ◄/► button to change the projector’s remote sensor on or off.

ON ⇔ OFF

The factory default setting is for both 1:NORMAL and 2:HIGH to be on. If the remote control does not function correctly, disable either of them.

- It’s not possible to disable both options at the same time.

**REMOTE ID**

Use the ▲/▼ buttons on the REMOTE ID menu to select ID and press the ► button.

ALL ⇔ 1 ⇔ 2 ⇔ 3 ⇔ 4

The projector is controlled by the remote control whose ID button is set the same number as this number. When the ALL is selected, the projector is controlled by a remote control irrespective of the ID setting.

Remember that incorrect network settings on this projector may cause trouble on the network. Be sure to consult with your network administrator before connecting to an existing access point on your network.

Select “NETWORK” from the main menu to access the following functions.

Select an item using the ▲/▼ cursor buttons on the projector or remote control, and press the ► cursor button on the projector or remote control, or ENTER button on the remote control to execute the item. Then perform it according to the following table.

See the Network Guide for details of NETWORK operation.

---

**NOTE**

- To use the wireless network function of this projector, the designated USB wireless adapter that is sold as an option is required. Do not use any extension cable or device when connecting the adapter to the projector.
- The projector does not allow both wireless and wired LAN to be connected to the same network.
- Do not set the same network address for both wireless and wired LAN.
- If you are not utilizing SNTP (3.1.8 Date/Time Settings in the Network Guide), then you must set the DATE AND TIME during the initial installation.
- The network communication control is disabled while the projector is in standby mode if the STANDBY MODE item of SETUP menu is set to SAVING. Please connect the network communication to the projector after setting the STANDBY MODE to NORMAL (49).

  • The projector will override this setting and retrieve DATE AND TIME information from the Time server when SNTP is enabled. *(3.1.8 Date/Time Settings in the Network Guide)*  
  • This setting will be reset if the projector is turned off while STANDBY MODE in the SETUP menu is set to SAVING *(49)*, or when the AC power is turned off.  

|                     | **CH** Use the ▲/▼ buttons to select the channel of the wireless LAN to be used while MODE *(69)* is set to ADHOC. Select according to the settings of your computer.  
  The channels 1 to 11 are available. To save the setting, press the ► button.  
  • The available channels would be various depending on a country. In addition, wireless network card might be required due to the standard.  
  • This item can only be selected when MODE is set to ADHOC. When MODE is set to INFRASTRUCTURE, the channel is automatically selected.  

|                     | **ENCRYPTION** Use the ▲/▼ buttons to select the encryption method to be used.  
  WPA2-PSK(AES) ⇔ WPA2-PSK(TKIP)  
  OFF ⇔ WPA-PSK(AES)  
  WEP 64bit ⇔ WEP 128bit ⇔ WPA-PSK(TKIP)  
  To save the setting, press the ► button.  
  • When MODE *(69)* is set to ADHOC, either WPA-PSK and WPA2-PSK cannot be selected.  
  • If IEEE802.11 n is used while MODE is set to INFRASTRUCTURE, TKIP and WEP are disabled. If OFF or AES is not selected, communication will switch automatically to IEEE802.11 b/g.

| WIRELESS SETUP (continued) | Use the ▲/▼ buttons to select the SSID to display the SSID menu.  

#1 DEFAULT ↔ #2 DEFAULT ↔ #3 DEFAULT 

← #5 CUSTOM ↔ #4 DEFAULT →  

Select one of the DEFAULT (#1~#4) and press ► or ENTER button.  

To adjust CUSTOM  

Press the ► or ENTER button when the #5 CUSTOM is selected. The SSID #5 CUSTOM menu will be appeared.  

(1) The current SSID will be displayed on the first line. If not yet written, the line will be blank. Use the ▲/▼/◄/► buttons and the ENTER or INPUT button to select and enter characters. To erase 1 character at one time, press the RESET button or press the ◄ and INPUT button at the same time. Also if you move the cursor to DELETE or ALL CLEAR on screen and press the ENTER or INPUT button, 1 character or all characters will be erased. The SSID can be input up to 32 characters.  

(2) To change an already inserted character, press the ▲/▼ button to move the cursor to one of the first 2 lines, and use the ◄/► buttons to move the cursor on the character to be changed. After pressing the ENTER or INPUT button, the character is selected. Then, follow the same procedure as described at the item (1) above.  

(3) To finish entering text, move the cursor to the OK on screen and press the ►, ENTER or INPUT button. To revert to the previous name without saving changes, move the cursor to the CANCEL on screen and press the ◄, ENTER or INPUT button.

</table>
| **DHCP (Dynamic Host Configuration Protocol)** | Use the ▲/▼ buttons to turn DHCP on/off.  
ON ↔ OFF  
Select OFF when the network does not have DHCP enabled. To save the setting, press the ► button.  
• When the “DHCP” setting changes to “ON”, it takes a little time to obtain IP address from DHCP server.  
• Auto IP function will be assigned an IP address if the projector could not obtain an IP address from server even if DHCP is “ON”. |
| **IP ADDRESS** | Use the ▲/▼/◄/► buttons to enter the IP ADDRESS.  
This function can only be used when DHCP is set to OFF.  
• The IP ADDRESS is the number that identifies this projector on the network. You cannot have two devices with the same IP ADDRESS on the same network.  
• The IP ADDRESS “0.0.0.0” is prohibited. |
| **SUBNET MASK** | Use the ▲/▼/◄/► buttons to enter the same SUBNET MASK used by your computer.  
This function can only be used when DHCP is set to OFF.  
• The SUBNET MASK “0.0.0.0” is prohibited. |
| **DEFAULT GATEWAY** | Use the ▲/▼/◄/► buttons to enter the DEFAULT GATEWAY (a node on a computer network that serves as an access point to another network) address.  
This function can only be used when DHCP is set to OFF. |
| **DNS SERVER** | Use the ▲/▼/◄/► buttons to input the DNS server address. The DNS server is a system to control domain names and IP addresses on the Network. |
### TIME DIFFERENCE

Use the ▲/▼ buttons to enter the TIME DIFFERENCE. Set the same TIME DIFFERENCE as the one set on your computer. If unsure, consult your IT manager. Use the ► button to return to the menu after setting the TIME DIFFERENCE.

- When this item is set, the same item in the WIRELESS SETUP menu is overwritten with the same setting.

### DATE AND TIME

Use the ▲/▼/◄/► buttons to enter the Year (last two digits), Month, Date, Hour and Minute.

- When this item is set, the same item in the WIRELESS SETUP menu is overwritten with the same setting.
- The projector will override this setting and retrieve DATE AND TIME information from the Time server when SNTP is enabled. ([3.1.8 Date/Time Settings in the Network Guide](#))
- This setting will be reset if the projector is turned off while STANDBY MODE in the SETUP menu is set to SAVING, or when the AC power is turned off.

### WIRED INFORMATION

Selecting this item displays the WIRED INFORMATION dialog for viewing the wired LAN settings.

- For details of PASSCODE, refer to the manual for “LiveViewer”.
- Only the first 16 characters of the PROJECTOR NAME are displayed.
- IP ADDRESS, SUBNET MASK and DEFAULT GATEWAY indicate “0.0.0.0” when DHCP is ON and the projector has not gotten address from DHCP server.

| **PRESENTATION**   | Selecting this item displays the PRESENTATION menu. Use ▲/▼ buttons to select one of the following items, then press ► or ENTER button to use the function.  
• To use Network Presentation, an exclusive application, “LiveViewer” is required. It can be installed from the bundled application CD. You can also download the latest version and relevant information from the Hitachi website (http://www.hitachi-america.us/digitalmedia or http://www.hitachidigitalmedia.com). For details of Network Presentation and instructions to install the “LiveViewer”, refer to the manual for “LiveViewer”. |
| **QUIT PRESENTER MODE** | If you set a computer to the Presenter mode while its image is projected, the projector is occupied by the computer and access from any other computer is blocked.  
Use this function to quit the Presenter mode and allow other computers to access the projector.  
Select this item to display a dialog.  
Press ► button to choose OK in the dialog.  
The Presenter mode is cancelled and a message is displayed indicating the result.  
• To make Presenter mode setting, use “LiveViewer”. For details, refer to the manual for “LiveViewer”. |
| **MULTI PC MODE**  | If you set one or more computers to the Multi PC mode on “LiveViewer” and send their images to the projector, you can select the display mode on the projector from two options below.  
- Single PC mode: displays the image of the selected computer on full screen.  
- Multi PC mode: displays the images sent from up to four computers on screen that is divided into quarter sections.  
Select this item to display a dialog.  
Use the dialog to change the display mode as explained below.  
• To change from Multi PC mode to Single PC mode, select one of computers in the dialog using the ▲/▼/◄/► buttons and press the ENTER or INPUT button.  
Press the ► button to choose OK, and then press ENTER or INPUT again. The image for the selected computer is displayed on full screen. |

This projector is equipped with security functions. From the SECURITY menu, items shown in the table below can be performed.

To use SECURITY menu: User registration is required before using the security functions.

**Enter to the SECURITY menu**

1. Press the ► button. The ENTER PASSWORD box will be displayed.
2. Use the ▲/▼/◄/► buttons to enter the registered password. The factory default password is as follows.
   - CP-X8150 : 3605
   - CP-WX8240 : 2005

This password can be changed (below). Move the cursor to the right side of the ENTER PASSWORD box and press the ► button to display the SECURITY menu.

- It is strongly recommended the factory default password to be changed as soon as possible.
- If an incorrect password is input, the ENTER PASSWORD box will be displayed again. If incorrect password is input 3 times, the projector will turn off. Afterwards the projector will turn off every time an incorrect password is input.

3. Items shown in the table below can be performed.

**If you have forgotten your password**

1. While the ENTER PASSWORD box is displayed, press and hold the RESET button on the remote control for about 3 seconds or press and hold the INPUT button for 3 seconds while pressing the ► button on the projector.

2. The 10 digit Inquiring Code will be displayed. Contact your dealer with the 10 digit Inquiring Code. Your password will be sent after your user registration information is confirmed.

- If there is no key input for about 55 seconds while the Inquiring Code is displayed, the menu will close. If necessary, repeat the process from (1).

<tbody>
<tr>
<td>MyScreen PASSWORD</td>
<td>The MyScreen PASSWORD function can be used to prohibit access to the MyScreen function and prevent the currently registered MyScreen image from being overwritten.</td>
</tr>
</tbody>
</table>

### 1 Turning on the MyScreen PASSWORD

1-1 Use the ▲/▼ buttons on the SECURITY menu to select MyScreen PASSWORD and press the ► button to display the MyScreen PASSWORD on/off menu.

1-2 Use the ▲/▼ buttons on the MyScreen PASSWORD on/off menu to select ON. The ENTER NEW PASSWORD box (small) will be displayed.

1-3 Use the ▲/▼/◄/► buttons to enter the password. Move the cursor to the right side of the ENTER NEW PASSWORD box (small) and press the ► button to display the NEW PASSWORD AGAIN box, enter the same PASSWORD again.

1-4 Move the cursor to the right side of the NEW PASSWORD AGAIN box and press the ► button to display the NOTE NEW PASSWORD box for about 30 seconds, please make note of the password during this time.

Pressing the ENTER button on the remote control or ► button on the projector will return to MyScreen PASSWORD on/off menu.

When a password is set for MyScreen:
- The MyScreen registration function (and menu) will be unavailable.
- The MyScreen Lock menu will be unavailable.
- The START UP setting will be locked on MyScreen (and the menu will be unavailable).

Turning the MyScreen PASSWORD off will allow normal operation of these functions.
- Please do not forget your MyScreen PASSWORD.

### 2 Turning off the MyScreen PASSWORD

2-1 Follow the procedure in 1-1 to display the MyScreen PASSWORD on/off menu.

2-2 Select OFF to display the ENTER PASSWORD box (large). Enter the registered password and the screen will return to the MyScreen PASSWORD on/off menu.

If an incorrect PASSWORD is input, the menu will close. If necessary, repeat the process from 2-1.

### 3 If you have forgotten your password

3-1 Follow the procedure in 1-1 to display the MyScreen PASSWORD on/off menu.

3-2 Select OFF to display the ENTER PASSWORD box (large). The 10 digit Inquiring Code will be displayed inside the box.

3-3 Contact your dealer with the 10 digit Inquiring Code. Your password will be sent after your user registration information is confirmed.

**1 Turning on the PIN LOCK**

1-1 Use the ▲/▼ buttons on the SECURITY menu to select PIN LOCK and press the ► button or the ENTER button to display the PIN LOCK on/off menu.

1-2 Use the ▲/▼ buttons on the PIN LOCK on/off menu to select ON and the Enter PIN Code box will be displayed.

1-3 Input a 4 part PIN code using the ▲/▼/◄/►, COMPUTER1 or INPUT button.

The PIN Code again box will appear. Reenter the same PIN code. This will complete the PIN code registration.

- If there is no key input for about 55 seconds while the Enter PIN Code box or the PIN Code again box is displayed, the menu will close. If necessary, repeat the process from 1-1.

Afterwards, anytime the projector is restarted after AC power is turned off the Enter PIN Code box will be displayed. Enter the registered PIN code. The projector can be used after entering the registered PIN code. If an incorrect PIN code is input, the Enter PIN code box will be displayed again. If an incorrect PIN code is input 3 times, the projector will turn off. Afterwards the projector will turn off every time an incorrect PIN code is input. The projector will also turn off if there is no key input for about 5 minutes while the Enter PIN code box is displayed.

This function will activate only when the projector is started after AC power is turned off.

- Please do not forget your PIN code.

**2 Turning off the PIN LOCK**

2-1 Follow the procedure in 1-1 to display the PIN LOCK on/off menu.

2-2 Use the ▲/▼ buttons to select OFF and the Enter PIN Code box will be displayed.

Enter the registered PIN code to turn the PIN LOCK function off.

If an incorrect PIN code is input 3 times, the projector will turn off.

**3 If you have forgotten your PIN code**

3-1 While the Enter PIN code box is displayed, press and hold the RESET button for three seconds or press and hold the INPUT button for 3 seconds while pressing the ► button on the projector.

The 10 digit Inquiring Code will be displayed.

- If there is no key input for about 5 minutes while the Inquiring Code is displayed, the projector will turn off.

3-2 Contact your dealer with the 10 digit Inquiring Code. Your PIN code will be sent after your user registration information is confirmed.

Presentation tools

The projector has the following convenient tools that enable on-screen presentations easily and quickly:

- PC-LESS Presentation
- USB Display
- Network Presentation
  For details of Network Presentation, refer to the Network Guide and the manual for "LiveViewer".
- Drawing function
  Drawing function enables you to draw on the projector’s screen with USB mouse or tablets connected to the USB TYPE A ports. For details of Drawing function, refer to the Operating Guide - Drawing function. It can be downloaded from Hitachi web site (http://www.hitachi-america.us/digitalmedia or http://www.hitachidigitalmedia.com).

PC-LESS Presentation

The PC-LESS Presentation reads image and audio data from the storage media inserted into the USB TYPE A ports and displays the image in the following modes.
The PC-LESS Presentation can be started by selecting the USB TYPE A as the input source.
This feature allows you to make your presentations without using your computer.

- Thumbnail mode
- Full Screen mode
- Slideshow mode

[Supported storage media]
- USB memory (USB memory type, USB hard disk and USB card reader type)

**NOTE**
- USB readers (adapters) that have more than one USB slot may not work (if the adapter is acknowledged as multiple devices connected).
- USB hubs may not work.
- USB devices with security software may not work.
- Be careful when inserting or removing a USB device. (12, 89)

[Supported format]
- FAT12, FAT16 and FAT32

**NOTE**
- NTFS is not supported.
PC-LESS Presentation (continued)

[Supported file format and its extension]
- JPEG (.jpeg, .jpg)  * Progressive is not supported.
- Bitmap (.bmp)  * 16bit mode and compressed bitmap is not supported.
- PNG (.png)  * Interlace PNG is not supported.
- GIF (.gif)
- Movie (.avi, .mov)  * Supported video format: Motion-JPEG
  Supported audio format: WAV (Linear PCM, Stereo 16bit), IMA-ADPCM

NOTE  • Files with a resolution larger than the following are not supported.
CP-X8150: 1024 x 768 (Still), 768 x 576 (Movie)
CP-WX8240: 1280 x 800 (Still), 768 x 576 (Movie)
(* Some computers may not support 1280 x 800.)
• Files with a resolution smaller than 36 x 36 are not supported.
• Files with a resolution smaller than 100 x 100 may not be displayed.
• Movie images with a frame rate higher than 15 fps cannot be displayed.
• Movie images with a bit rate higher than 20 Mbps cannot be displayed.
• Some supported files may not be displayed.
• Only a frame appears when the content of image data cannot be displayed in
  the Thumbnail mode.
• Even with the file format and audio format combinations described above,
  playback of some files may fail.

Thumbnail Mode

The Thumbnail mode displays the images stored in a USB storage device on the
Thumbnail screen. Maximum 20 images are displayed in a screen.
If you wish, you can jump into the Full Screen mode or Slideshow mode, after you
select some images in the Thumbnail mode.
The Thumbnail mode will be started as the primary function of the PC-LESS
Presentation after selecting the USB TYPE A as the input source.
Operating by buttons

You can control the images on the Thumbnail screen with the remote control, control panel or Web Remote Control. The following functions can be supported while the Thumbnail screen is displayed.

<table>
<thead>
<tr>
<th>Remote control</th>
<th>Control panel</th>

• It is not possible to change the input port by using the **INPUT** button when the Thumbnail screen, Slideshow, or Full Screen image is displayed.
**PC-LESS Presentation (continued)**

### Slideshow Mode

The Slideshow mode displays images in full screen and switches the images at intervals set in INTERVAL on the Thumbnail menu (89).

You can start this function from the Slideshow menu. To display the Slideshow menu, select the SLIDESHOW button in the Thumbnail menu and press the ENTER button on the remote control, INPUT button on the control panel, or click [ENTER] on the Web Remote Control.

While the Slideshow is displayed, the following button operations are enabled when still images are displayed, and the same button operations in the Full Screen mode are enabled when movies are displayed.

<table>
<thead>
<tr>
<th>Button operation</th>
<th>Functions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Remote control</td>
<td></td>
</tr>
<tr>
<td>Control panel</td>
<td></td>
</tr>
<tr>
<td>Web Remote Control</td>
<td></td>
</tr>
<tr>
<td>ENTER</td>
<td>Displays Thumbnail.</td>
</tr>
<tr>
<td>INPUT</td>
<td>[ENTER]</td>
</tr>
</tbody>
</table>

**NOTE**  
- These operations are not accessible while the projector OSD is displayed.  
- It is not possible to change the input port by using the INPUT button when the Thumbnail screen, Slideshow, or Full Screen image is displayed.  
- When the Slideshow mode is set to ONE TIME and the last file is a still image, the last slide of the presentation will remain displayed until the ENTER button on the remote control or Web Remote Control, or the INPUT button on the control panel is pressed.
**PC-LESS Presentation (continued)**

You can play the Slideshow at your desired configuration. Configure the SLIDESHOW item in the Thumbnail menu.

1) RETURN : Returns to the Thumbnail mode.
2) PLAY : Play the Slideshow.
3) START : Set the beginning number of the Slideshow.
4) STOP : Set the end number of the Slideshow.
5) INTERVAL : Sets the interval time for displaying still images during the Slideshow.
   It is not recommend to set the interval time very short something like several seconds, because it may take more than several seconds to read and display an image file if it is stored in very deep layer directory or if so many files are stored in the same directory.
6) PLAY MODE : Selects the mode of Slideshow.
   ONE TIME : Play the Slideshow one time.
   ENDLESS : Play the Slideshow endless.

---

**NOTE**
- The settings of the Slideshow are saved to the “playlist.txt” file that is stored in the storage media. If the file is not existed, it is generated automatically.
- The settings for the START, STOP, INTERVAL, and PLAY MODE are saved to the Playlist.
- If the storage media is under the write protection or the “playlist.txt” is the read only type file, it is impossible to change the settings of the Slideshow.
**PC-LESS Presentation (continued)**

**Playlist**

The Playlist is a DOS format text file, which decides the order of displayed still image files in the Thumbnail mode or Slideshow. The playlist file name is “playlist.txt” and it can be edited on a computer. It is created in the folder that contains the selected image files when the PC-LESS Presentation is started or the Slideshow is configured.

**[Example of “playlist.txt” files]**

```
START setting : STOP setting : INTERVAL setting : PLAY MODE setting :
img001.jpg: : : :
img002.jpg:600: : :
img003.jpg:700:rot1: :
img004.jpg: : :SKIP:
img005.jpg:1000:rot2:SKIP:
```

The “playlist.txt” file contains the following information. Each piece of information requires to be separated by “:”, and “:” at the end of each line.

1st line: START, STOP, INTERVAL and PLAY MODE settings (\textsuperscript{89}).

2nd line and after: file name, interval time, rotation setting and skip setting.

- interval time: It can be set from 0 to 999900 (ms) with an increment of 100 (ms).
- rotation setting: “rot1” means a rotation at 90 degrees clockwise; “rot2” and “rot3” increase another 90 degrees in order.
- skip setting: “SKIP” means that the image will not be displayed in the Slideshow.

**NOTE** • The maximum length in a line on the "playlist.txt" file is 255 characters including linefeed. If any line exceeds the limit, the "playlist.txt" file becomes invalid.

• Up to 999 files can be registered to the Playlist. However, if some folders exist in the same directory the limit number is decreased by the number of folders. Any files over the limit will not be shown in the Slideshow.

• If the storage device is protected or does not have sufficient space, the “playlist.txt” file cannot be created.

• For the Slideshow settings, refer to the section **Slideshow mode** (\textsuperscript{93}).
USB Display

The projector can display images transferred from a computer via an USB cable (11).

Hardware and software requirement for computer
- **OS**: One of the following. (32 bit version only)
  - Windows® XP Home Edition /Professional Edition
  - Windows Vista® Home Basic /Home Premium /Business /Ultimate /
    Enterprise
  - Windows® 7 Starter /Home Basic /Home Premium /Professional / Ultimate /
    Enterprise
- **CPU**: Pentium 4 (2.8 GHz or higher)
- **Graphic card**: 16 bit, XGA or higher
- **Memory**: 512 MB or higher
- **Hard disk space**: 30 MB or higher
- **USB(A) Port
- **USB cable**: 1 piece

Starting USB Display

Select the USB DISPLAY for the USB TYPE B item in the OPTION menu. When you connect your computer to the USB TYPE B port on the projector using a USB cable, the projector will be recognized as a CD-ROM drive on your computer. Then, the software in the projector, “LiveViewerLiteUSB.exe”, will run automatically and the application, “LiveViewer Lite for USB”, will be ready on your computer for the USB Display. The application, “LiveViewer Lite for USB”, will be automatically closed when the USB cable is unplugged.

**NOTE** • If the software does not start automatically (this is typically because CD-ROM autorun is disabled on your OS), follow the instructions below.
(1) Click on the [Start] button on the toolbar and select the “Run”
(2) Enter F:\LiveViewerLiteUSB.exe and then press the [OK]

- CD-ROM autorun is disabled while the screen saver is running.
- The image transmission from the computer is suspended while the password-protected screen saver is running. To resume the transmission, exit the screen saver.
- Check our web site for the latest version of the software and its manual.

(✉User's Manual (concise))

Follow the instructions that can be obtained at the site for updating.

(continued on next page)
**USB Display (continued)**

This application will appear as an icon in the Windows notification area once it starts. You can quit the application from your computer by selecting “Quit” on the menu.

**NOTE** • The “LiveViewer” (refer to the Network Guide) and this application cannot be used at the same time. If you connect your computer to the projector by using a USB cable while the “LiveViewer” is running, the following message will be displayed.
• Depending on the software installed on your computer, images on your computer cannot be transferred using “LiveViewer Lite for USB”.
• If any application software having the firewall function is installed into your computer, make the firewall function invalid with following the user's manual.
• Some security software may block image transmission. Please change the security software setting to allow the use of “LiveViewer Lite for USB”.
• When the audio input from USB TYPE B (50) is selected, if the sound level is still low even after raising the volume level in the projector to the maximum, check whether your computer outputs audio and raise the volume level accordingly.
**Presentation tools**

**USB Display (continued)**

**Right-Click menu**
The menu shown in the right will be displayed when you right-click the application icon in the Windows notification area.

<table>
<thead>
<tr>
<th>Display</th>
<th>Quit</th>
</tr>
</thead>
</table>

Display : The Floating menu is displayed, and the icon disappears from the Windows notification area.

Quit : The application is closed, and the icon disappears from the Windows notification area.

**NOTE** • If you wish to restart the application, you need to unplug the USB cable and plug it again.

**Floating menu**

If you select “Display” on the Right-Click menu, the Floating menu shown in the right will appear on your computer screen.

- **① Start capture button**  
  The transmission to the projector is started and the images will be displayed.

- **② Stop capture button**  
  The image transmission is stopped.

- **③ Hold button**  
  The image on the projector’s screen is temporally frozen. The last image before the button is clicked is remained on the screen. You can revise the image data on your computer without showing it on the projector’s screen.

- **④ Option button**  
  The Options window is displayed.

- **⑤ Minimize button**  
  The Floating menu is closed, and the icon reappears in the Windows notification area.

**NOTE** • Images may not be displayed on screen, if the start/stop capture buttons are clicked repeatedly.
USB Display (continued)

Options window
If you select the Option button on the Floating menu, the Options window is displayed.

Optimize Performance
The “LiveViewer Lite for USB” captures screenshots in JPEG data and sends them to the projector. The “LiveViewer Lite for USB” has two options that have different compression rate of JPEG data.

Transmission speed
Speed takes priority over Image quality. It makes JPEG compression rate higher. The screen on the projector is rewritten quicker because the transferred data is smaller, but the image quality is worse.

Image quality
Image quality takes priority over Speed. It makes JPEG compression rate lower. The screen on the projector is rewritten slower because the transferred data is larger, but the image quality is better.

Keep PC resolution
If you remove the check mark from the [Keep PC resolution] box, the screen resolution of your computer will be switched as follows, and the display speed may be faster.

- CP-X8150: 1024 x 768 (XGA)
- CP-WX8240: 1280 x 800

If your computer does not support the display resolution specified above, a smaller resolution that is the largest among the resolutions that are supported by the computer will be selected.

Sound
Turns the sound on/off. The image quality may deteriorate when you play back audio data transferred together with the image data. To give priority to the image quality, turn off the sound by selecting the checkbox.

Display LiveViewer Lite for USB
If you want to display the "LiveViewer Lite for USB" application window on the screen, please check the box.

About
The version information of the “LiveViewer Lite for USB”.

NOTE • When the resolution is changed, the arrangement of icons on computer desktop screen may be changed.
• If one of the AUDIO IN ports is selected or X is selected for USB TYPE B in AUDIO SOURCE of the AUDIO menu (50), audio sound operation in the Options window will be disabled.
Replacing the lamp

A lamp has finite product life. Using the lamp for long periods of time could cause the pictures darker or the color tone poor. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. Preparation of a new lamp and early replacement are recommended. To prepare a new lamp, make contact with your dealer and tell the lamp type number.

Type number : DT01281

Replacing the lamp

1. Turn the projector off, and unplug the power cord. Allow the projector to cool for at least 45 minutes.

2. Prepare a new lamp. If the projector is mounted on a ceiling, or if the lamp has broken, also ask the dealer to replace the lamp.

In case of replacement by yourself, follow the following procedure.

3. Loosen the screw (marked by arrow) of the lamp cover and then slide down and lift the lamp cover to remove it.

4. Loosen the 3 screws (marked by arrow) of the lamp, and slowly pull the lamp out by the handles. Never loosen any other screws.

5. Insert the new lamp, and retighten firmly the 3 screws of the lamp that are loosened in the previous process to lock it in place.

6. While putting the interlocking parts of the lamp cover and the projector together, slide the lamp cover back in place. Then firmly fasten the screw of the lamp cover.

7. Turn the projector on and reset the lamp time using the LAMP TIME item in the OPTION menu.
   (1) Press the MENU button to display a menu.
   (2) Point at the ADVANCED MENU in the menu using the ▼/▲ button, then press the ► button.
   (3) Point at the OPTION in the left column of the menu using the ▼/▲ button, then press the ► button.
   (4) Point at the LAMP TIME using the ▼/▲ button, then press the ► button. A dialog will appear.
   (5) Press the ► button to select “OK” on the dialog. It performs resetting the lamp time.

CAUTION ▶ Do not touch any inner space of the projector, while the lamp is taken out.

NOTE • Please reset the lamp time only when you have replaced the lamp, for a suitable indication about the lamp.
Replacing the lamp (continued)

Lamp warning

⚠️ HIGH VOLTAGE ⚠️ HIGH TEMPERATURE ⚠️ HIGH PRESSURE

⚠️ WARNING ♂ The projector uses a high-pressure mercury glass lamp. The lamp can break with a loud bang, or burn out, if jolted or scratched, handled while hot, or worn over time. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. In addition, if the bulb bursts, it is possible for shards of glass to fly into the lamp housing, and for gas containing mercury and dust containing fine particles of glass to escape from the projector’s vent holes.

♂ About disposal of a lamp: This product contains a mercury lamp; do not put it in a trash. Dispose of it in accordance with environmental laws.

• For lamp recycling, go to www.lamprecycle.org (in the US).
• For product disposal, consult your local government agency or www.eiae.org (in the US) or www.epsc.ca (in Canada).
For more information, call your dealer.

- If the lamp should break (it will make a loud bang when it does), unplug the power cord from the outlet, and make sure to request a replacement lamp from your local dealer. Note that shards of glass could damage the projector’s internals, or cause injury during handling, so please do not try to clean the projector or replace the lamp yourself.
- If the lamp should break (it will make a loud bang when it does), ventilate the room well, and make sure not to inhale the gas or fine particles that come out from the projector’s vent holes, and not to get them into your eyes or mouth.
- Before replacing the lamp, turn the projector off and unplug the power cord, then wait at least 45 minutes for the lamp to cool sufficiently. Handling the lamp while hot can cause burns, as well as damaging the lamp.

Never unscrew except the appointed (marked by an arrow) screws.
- Do not open the lamp cover while the projector is suspended from a ceiling. This is dangerous, since if the lamp’s bulb has broken, the shards will fall out when the cover is opened. In addition, working in high places is dangerous, so ask your local dealer to have the lamp replaced even if the bulb is not broken.
- Do not use the projector with the lamp cover removed. At the lamp replacing, make sure that the screws are screwed in firmly. Loose screws could result in damage or injury.

Use only the lamp of the specified type. Use of a lamp that does not meet the lamp specifications for this model could cause a fire, damage or shorten the life of this product.
- If the lamp breaks soon after the first time it is used, it is possible that there are electrical problems elsewhere besides the lamp. If this happens, consult your local dealer or a service representative.
- Handle with care; jolting or scratching could cause the lamp bulb to burst during use.
- Using the lamp for long periods of time, could cause it dark, not to light up or to burst. When the pictures appear dark, or when the color tone is poor, please replace the lamp as soon as possible. Do not use old (used) lamps; this is a cause of breakage.
Cleaning and replacing the air filter

Please check and clean the air filter periodically. When the indicators or a message prompts you to clean the air filter, comply with it as soon as possible. The air filter of this projector consists of a filter cover and a filter unit with two types of filter. If one or both of the filters are damaged or heavily soiled, replace the filter unit with a new one.

Request for a filter unit with the following type number from your dealer when purchasing a new unit.

Type number : MU06642 (Filter unit)

1. Turn the projector off, and unplug the power cord. Allow the projector to sufficiently cool down.
2. Use a vacuum cleaner on and around the filter cover.
3. Pick and pull up the filter cover knobs to take it off.
4. Press up slightly the bottom side knobs to unlock the bottom side of the filter unit. Pull the center knob to take the filter unit off.
5. Use a vacuum cleaner for the filter vent of the projector and the outer side of the filter unit.
6. The filter unit consists of two parts. Press down around the interlocking parts to unlock, then separate the two parts.
7. Use a vacuum cleaner for the inner side of each part of the filter unit to clean them up. If the filters are damaged or heavily soiled, replace them with the new ones.
8. Combine the two parts to reassemble the filter unit.
9. Put the filter unit back into the projector.

(continued on next page)
Cleaning and replacing the air filter (continued)

10. Put the filter cover back into the place.

11. Turn the projector on and reset the filter time using the FILTER TIME item in the EASY MENU.
   (1) Press the MENU button to display a menu.
   (2) Point at the FILTER TIME using the ▲/▼ cursor buttons, then press the ► cursor (or the ENTER / the RESET) button. A dialog will appear.
   (3) Press the ► cursor button to select the “OK” on the dialog. It performs resetting the filter time.

⚠️ WARNING ⚠️ Before taking care of the air filter, make sure the power cable is not plugged in, then allow the projector to cool sufficiently.
   ➤ Use only the air filter of the specified type. Do not use the projector without the air filter or the filter cover. It could result in a fire or malfunction to the projector.
   ➤ Clean the air filter periodically. If the air filter becomes clogged by dust or the like, internal temperatures rise and could cause a fire, a burn or malfunction to the projector.

NOTE • Please reset the filter time only when you have cleaned or replaced the air filter, for a suitable indication about the air filter.
• The projector may display the message such as the “CHECK THE AIR FLOW” or turn off the projector, to prevent the internal heat level rising.
Other care

Inside of the projector

In order to ensure the safe use of your projector, please have it cleaned and inspected by your dealer about once every year.

Caring for the lens

If the lens is flawed, soiled or fogged, it could cause deterioration of display quality. Please take care of the lens, being cautious of handling.

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.

2. After making sure that the projector is cool adequately, lightly wipe the lens with a commercially available lens-cleaning wipe. Do not touch the lens directly with your hand.

Caring for the cabinet and remote control

Incorrect care could have adverse influence such as discoloration, peeling paint, etc.

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.

2. After making sure that the projector is cool adequately, lightly wipe with gauze or a soft cloth.
   If the projector is extremely dirty, dip soft cloth in water or a neutral cleaner diluted in water, and wipe lightly after wringing well. Then, wipe lightly with a soft, dry cloth.

⚠️ WARNING  ►Before caring, make sure the power cord is not plugged in, and then allow the projector to cool sufficiently. The care in a high temperature state of the projector could cause a burn and/or malfunction to the projector.
►Never try to care for the inside of the projector personally. Doing is so dangerous.
►Avoid wetting the projector or inserting liquids in the projector. It could result in a fire, an electric shock, and/or malfunction to the projector.
• Do not put anything containing water, cleaners or chemicals near the projector.
• Do not use aerosols or sprays.

⚠️ CAUTION  ►Please take right care of the projector according to the following. Incorrect care could cause not only an injury but adverse influence such as discoloration, peeling paint, etc.
►Do not use cleaners or chemicals other than those specified in this manual.
►Do not polish or wipe with hard objects.

NOTICE  ►Do not directly touch the lens surface with hands.
If an abnormal operation should occur, stop using the projector immediately.

⚠️ WARNING ⚠️ Never use the projector if abnormal operations such as smoke, strange odor, excessive sound, damaged casing or elements or cables, penetration of liquids or foreign matter, etc. should occur. In such cases, immediately disconnect the power plug from the power outlet. After making sure that the smoke or odor has stopped, contact to your dealer or service company. Otherwise if a problem occurs with the projector, the following checks and measures are recommended before requesting repair.

If this does not resolve the problem, please contact your dealer or service company. They will tell you what warranty condition is applied.

  - Pressing the one of buttons to call a signal input might be ignored, when all the input ports belonging to the category the button's name shows are set to the "SKIP" by the item SOURCE SKIP of the OPTION menu. |
## Regarding the indicator lamps

When operation of the LAMP, TEMP and POWER indicators differs from usual, check and cope with it according to the following table.

<table>
<thead>
<tr>
<th>POWER indicator</th>
<th>LAMP indicator</th>
<th>TEMP indicator</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lighting <strong>Orange</strong></td>
<td>Turned off</td>
<td>Turned off</td>
<td>The projector is in a standby state. Please refer to the section “Power on/off”.</td>
</tr>
<tr>
<td><strong>Blinking In Green</strong></td>
<td>Turned off</td>
<td>Turned off</td>
<td>The projector is warming up. Please wait.</td>
</tr>
<tr>
<td>Lighting <strong>Green</strong></td>
<td>Turned off</td>
<td>Turned off</td>
<td>The projector is in an on state. Ordinary operations may be performed.</td>
</tr>
<tr>
<td><strong>Blinking In Orange</strong></td>
<td>Turned off</td>
<td>Turned off</td>
<td>The projector is cooling down. Please wait.</td>
</tr>
<tr>
<td><strong>Blinking In Red</strong></td>
<td>(discretionary)</td>
<td>(discretionary)</td>
<td>The projector is cooling down. A certain error has been detected. Please wait until POWER indicator finishes blinking, and then perform the proper measure using the item descriptions below.</td>
</tr>
<tr>
<td><strong>Blinking In Red</strong> or <strong>Lighting In Red</strong></td>
<td>Lighting <strong>Red</strong></td>
<td>Turned off</td>
<td>The lamp does not light, and there is a possibility that interior portion has become heated. Please turn the power off, and allow the projector to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation of the following items, and then turn the power on again. • Is there blockage of the air passage aperture? • Is the air filter dirty? • Does the peripheral temperature exceed 40°C? If the same indication is displayed after the remedy, please change the lamp referring to the section Replacing the lamp.</td>
</tr>
<tr>
<td><strong>Blinking In Red</strong> or <strong>Lighting In Red</strong></td>
<td><strong>Blinking In Red</strong></td>
<td>Turned off</td>
<td>The lamp cover has not been properly fixed. Please turn the power off, and allow the projector to cool down at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp cover. After performing any needed maintenance, turn the power on again. If the same indication is displayed after the remedy, please contact your dealer or service company.</td>
</tr>
</tbody>
</table>

Troubleshooting

Regarding the indicator lamps (continued)

<table>
<thead>
<tr>
<th>POWER indicator</th>
<th>LAMP indicator</th>
<th>TEMP indicator</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blinking In Red or Lighting In Red</td>
<td>Turned off</td>
<td>Blinking In Red</td>
<td>The cooling fan is not operating. Please turn the power off, and allow the projector to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation that no foreign matter has become caught in the fan, etc., and then turn the power on again. If the same indication is displayed after the remedy, please contact your dealer or service company.</td>
</tr>
<tr>
<td>Blinking In Red or Lighting In Red</td>
<td>Turned off</td>
<td>Lighting In Red</td>
<td>There is a possibility that the interior portion has become heated. Please turn the power off, and allow the projector to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation of the following items, and then turn the power on again. • Is there blockage of the air passage aperture? • Is the air filter dirty? • Does the peripheral temperature exceed 40°C? • Is the setting for ALTITUDE appropriate? For details on ALTITUDE, refer to ALTITUDE of SERVICE in the OPTION menu (62). If the projector is used with a wrong setting, it may cause damage to the projector itself or the parts inside.</td>
</tr>
<tr>
<td>Lighting In Green</td>
<td>Simultaneous blinking in Red</td>
<td></td>
<td>It is time to clean the air filter. Please immediately turn the power off, and clean or change the air filter referring to the section Cleaning and replacing the air filter. After cleaning or changing the air filter, please be sure to reset the filter timer. After the remedy, reset the power to ON.</td>
</tr>
<tr>
<td>Lighting In Green</td>
<td>Alternative blinking in Red</td>
<td></td>
<td>There is a possibility that the interior portion has become overcooled. Please use the unit within the usage temperature parameters (5°C to 40°C). After the treatment, reset the power to ON.</td>
</tr>
<tr>
<td>Blinking In Green for approx. 3 seconds.</td>
<td>Turned off</td>
<td>Turned off</td>
<td>At least 1 Power ON schedule is saved to the projector. Please refer to 3.1.7 Schedule Settings in the Network Guide.</td>
</tr>
</tbody>
</table>

**NOTE** • When the interior portion has become overheated, for safety purposes, the projector is automatically shut down, and the indicator lamps may also be turned off. In such a case, disconnect the power cord, and wait at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover, and then turn the power on again.
Regarding the indicator lamps (continued)

For the SECURITY indicator, see SECURITY INDICATOR in the SECURITY menu (85).

For the SHADE indicator, see the section "Temporarily shading the screen" (32).

The FILTER indicator shows the condition of the air filter. Utilize this feature to keep the interior of the projector in good condition.

<table>
<thead>
<tr>
<th>FILTER indicator</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Turned off</td>
<td>The air filter is clean. No need to clean up.</td>
</tr>
<tr>
<td>Lighting In Orange</td>
<td>The air filter is going to be choked. It is recommended to clean it.</td>
</tr>
<tr>
<td>Lighting In Red</td>
<td>The air filter is choked. It is required to turn the power off and clean the air filter immediately.</td>
</tr>
</tbody>
</table>

**NOTE** • The FILTER indicator might light up in orange or red when something blocks the intake vents even though the air filter is clean.
• The FILTER indicator might light up differently from other indicators or display messages related to cleaning the air filter. Follow the prompt that is displayed earlier.

Resetting all settings

When it is hard to correct some wrong settings, the FACTORY RESET function of SERVICE item in OPTION menu (68) can reset all settings (except settings such as LANGUAGE, LAMP TIME, FILTER TIME, FILTER MESSAGE, STANDBY MODE, COMMUNICATION, SECURITY and NETWORK) to the factory default.
**Phenomena that may be easy to be mistaken for machine defects**

About the phenomenon confused with a machine defect, check and cope with it according to the following table.

<table>
<thead>
<tr>
<th>Phenomenon</th>
<th>Cases not involving a machine defect</th>
<th>Reference page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power does not come on.</td>
<td>The electrical power cord is not plugged in. Correctly connect the power cord.</td>
<td>16</td>
</tr>
<tr>
<td></td>
<td>The main power source has been interrupted during operation such as by a power outage (blackout), etc. Please disconnect the power plug from the power outlet, and allow the projector to cool down at least 10 minutes, then turn the power on again.</td>
<td>16</td>
</tr>
<tr>
<td></td>
<td>Either there is no lamp and/or lamp cover, or either of these has not been properly fixed. Please turn the power off and disconnect the power plug from the power outlet, and allow the projector to cool down at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover, and then turn the power on again.</td>
<td>100</td>
</tr>
<tr>
<td>Neither sounds nor pictures are outputted.</td>
<td>The signal cables are not correctly connected. Correctly connect the connection cables.</td>
<td>10 ~ 14</td>
</tr>
<tr>
<td></td>
<td>Signal source does not correctly work. Correctly set up the signal source device by referring to the manual of the source device.</td>
<td>–</td>
</tr>
<tr>
<td></td>
<td>The input changeover settings are mismatched. Select the input signal, and correct the settings.</td>
<td>22</td>
</tr>
<tr>
<td></td>
<td>AV MUTE function is working. Press AV MUTE button on the remote control.</td>
<td>21</td>
</tr>
<tr>
<td>Sound does not come out.</td>
<td>The signal cables are not correctly connected. Correctly connect the audio cables.</td>
<td>10 ~ 14</td>
</tr>
<tr>
<td></td>
<td>The volume is adjusted to an extremely low level. Adjust the volume to a higher level using the menu function or the remote control.</td>
<td>21, 50</td>
</tr>
<tr>
<td></td>
<td>The AUDIO SOURCE/SPEAKER setting is not correct. Correctly set the AUDIO SOURCE/SPEAKER in AUDIO menu.</td>
<td>50</td>
</tr>
</tbody>
</table>

<tr>
<td></td>
<td>The COMMUNICATION TYPE for the CONTROL port is set to NETWORK BRIDGE. Select OFF for COMMUNICATION TYPE item in the OPTION - SERVICE - COMMUNICATION menu.</td>
<td>65</td>
</tr>
<tr>
<td>Network does not work</td>
<td>The SAVING function is working. Select NORMAL for STANDBY MODE item in the SETUP menu.</td>
<td>49</td>
</tr>
<tr>
<td></td>
<td>The same network address is set for both wireless and wired LAN. Change the network address setting for wireless or wired LAN.</td>
<td>70, 74</td>
</tr>
</tbody>
</table>
### Phenomena that may be easy to be mistaken for machine defects (continued)

<table>
<thead>
<tr>
<th>Phenomenon</th>
<th>Cases not involving a machine defect</th>
<th>Reference page</th>
</tr>
</thead>
</table>
| NETWORK BRIDGE function does not work                                     | **The NETWORK BRIDGE function is turned off.**
Select NETWORK BRIDGE for COMMUNICATION TYPE item in the OPTION - SERVICE - COMMUNICATION menu.                                                                 | 65             |
| Schedule function does not work                                           | **The SAVING function is working.**
Select NORMAL for STANDBY MODE item in the SETUP menu.                                                                                                                 | 49             |
| When the projector is connected to the network, it powers off and on as described below. | **The internal clock has been reset.**
Once you turn off the projector in the SAVING mode or the AC power, the current date and time setting is reset.
Check the DATE AND TIME setting for WIRELESS SETUP or WIRED SETUP in the NETWORK menu.                               | 71, 75         |
| Powers off Calc. Indicator blinks in orange a few times Goes into standby mode | **Disconnect the LAN cable and check that the projector is working properly.**
If this phenomenon occurs after connecting to the network, there may be a loop between two Ethernet switching hubs within the network, as explained below.
- There are two or more Ethernet switching hubs in a network.
- Two of the hubs are doubly connected by LAN cables.
- This double connection forms a loop between the two hubs.
Such a loop may have an adverse effect on the projector as well as the other network devices.
Check the network connection and remove the loop by disconnecting the LAN cables such that there is only one connecting cable between two hubs. | –              |

**NOTE** • Although bright spots or dark spots may appear on the screen, this is a unique characteristic of liquid crystal displays, and it does not constitute or imply a machine defect.
Specifications

Please see the Specifications in the User’s Manual (concise) which is a book.

End User License Agreement for the Projector Software

- Software in the projector consists of the plural number of independent software modules and there exist our copyright or/and third party copyrights for each of such software modules.
- Be sure to read “End User License Agreement for the Projector Software” which is separated document.
