

RZ410AT6 PWH

410 Litre Refrigerator (White)

KEY FEATURES:

- Minus Zero:
Minus Zero is a hybrid technology which combines fan cooling and direct cooling to create a panel which has the same effect as an "ice block". The aluminium panel, located at the back of the refrigerator allows for uniform temperature distribution resulting in effective cooling and fresher food whilst saving energy.
- Advanced Multiflow Air System:
Allows cold air to circulate evenly throughout the refrigerator keeping all areas at constant temperature.
- Nano Titanium Filter:
The Nano Titanium Filter traps and substantially reduces bacteria and odour, leaving the refrigerator purified and odourless.
- Negative Ions:
Negative Ions, along with the chilled air, circulate throughout the compartment, adhering to odours and bacteria helping to suppress bacterial growth.
- Tempered Glass Shelves
- Twist Ice Trays
- Mould Proof Door Gasket
- Chilled Compartment
- Two Way Humidity Control System
