Smooth and Smart
With the CP-RX70, your presentation worries are over!

Three innovative features that make your presentations smooth and smart.

The projector is compact, flat and bright!
- Smart design is flat and smooth.
- Compact size makes it easy to carry.
- High brightness means there's no need to turn off the room lights.

You can give presentations in small rooms!
- Short throw of 1.8m (5.9 ft.) onto a large 60” screen.
- Smooth use even in small rooms and limited spaces.
- Give smart and powerful presentations on large screens.

Low noise lets the audience concentrate on the presentation!
- Quiet design — only 29dB (Whisper model).
- Your audience can concentrate on the smooth presentation.
- Low noise keeps presentations flowing with smart effectiveness.

**Whiteboard and Blackboard Compatibility**

In rooms with no screen, the CP-RX70 can project onto a whiteboard or blackboard. In whiteboard mode, the white signal is only half as bright, ensuring optimum visibility. The blackboard mode is compatible with both black and green blackboards.

**3-Second Quick Start and Direct Power Off**

The CP-RX70 starts in only about three seconds* from power on to projection, reducing the frustration of having to wait for the image to appear. The Direct Power Off function eliminates the need for cooldown after using the projector. After turning the power off, you can put the projector away immediately.

* Times until start of projection. According to the power restart time and settings, start time may be longer.

**Digital Vertical Keystone Correction**

Keystone distortion occurs when the projector is inclined. The CP-RX70’s Keystone Correction function can correct vertical keystone distortion. It’s one more way the CP-RX70 smooths your preparations for a presentation.
