**Superior features that make easy maintenance possible.**
Thanks to the Hybrid Filter, maintenance and cleaning are much less frequent, making longer operation possible. With the lamp door on the top and the filter cover on the side, maintenance and replacement of these parts can be done easily even in installed projectors.

**Security**
- **Security Mark**
- **PIN Lock and My Screen PIN Lock**
- **Transition Detector**

**Lamp Door on Top**
Easy replacement when the projector is mounted on the ceiling.

**New Hybrid Filter**
Filter maintenance frequency has been improved from every 400 hours to every 2,000 hours.

**Versatile Security**
- **Improved Security Bar Prevents Theft**
These projectors have an improved Security Bar that provides a deeper space for heavy chains. They also have a Kensington security slot for using a lock to attach a cable. These security functions prevent theft when the projector is mounted on a ceiling or used on a cart-top.

- **Low Noise of 29dBA (Whisper Mode)**
Using a new fan design, these projectors achieve a low noise of 29dBA in Whisper mode. With performance as quiet as a guest room in a hotel, they make it easy to give lessons or presentations in small size classrooms or conference rooms without noise distracting the audience.

- **Limit Users with PIN Lock and My Screen PIN Lock**
PIN Lock ensures that only those who know the PIN can use the projector. My Screen PIN Lock locks in a certain image at the startup screen. Using a school name or company logo, for example, makes it clear who owns the projector to prevent use by unauthorized persons.

- **Transition Detector Prevents Unauthorized Use**
Even if someone takes it without authorization, that person cannot use it.

- **My Text Function**
My Text lets you put text on the startup screen, according to your needs, such as model name, serial number or location information.

- **4,000-Hour Lamp Life in Whisper Mode**
The CP-X301 and CP-X401 have achieved a lamp life of 5,000 hours in standard mode and 4,000 hours in whisper mode.*

- **Remote Control Makes Operation Easier**
My Button and My Source buttons on the remote control give you fast access to frequently used functions and sources.

- **Daytime Mode Corrects Details in Bright Conditions**
Projected images may sometimes be difficult to see under bright lighting. The Daytime Mode uses image quality correction technology to counter the effects of light, ensuring clear, vivid images.

**Superior Usability**
- **You Choose the Brightness According to Each Situation**
The three models have different brightness outputs, each suited to a different space—large lecture halls, medium size meeting rooms, or small room such as a classroom. You can choose the model with the appropriate brightness.
  - CP-X201: 2,500 ANSI Lumens
  - CP-X301: 2,600 ANSI Lumens
  - CP-X401: 3,000 ANSI Lumens

- **Resolution Preset and Custom Modes for Compatibility with Widescreen Computers**
Certain projectors are not able to properly display the aspect ratio when the input source is a widescreen computer. The Resolution Preset and Custom modes ensure that these projectors display the correct ratio, so you always see images the way they should be viewed.

- **Convenient Audio Pass Through**
Audio can be output in stand-by mode, allowing you to listen to external speakers via the projector's audio output. This saves lamp life when you only need sound.

- **Saving Mode**
The Saving mode reduces standby power consumption.*
  - CP-X201: 3W
  - CP-X301: 3W
  - CP-X401: 3W

- **Software**
- 4-Second Quick Start
- Direct Power On/Off
- 3:2 Pull Down
- Noise Reduction
- Motion Adaptive Progressive Scan
- Equalizing Gamma Function
- Auto Vertical Keystone Correction
- Input Source Naming
- IR Remote Frequency Change
- On-Screen Menu
- Security Label Included

**LCD Projectors**
- CP-X201/CP-X301/CP-X401
  - 2,500 ANSI Lumens
  - 2,600 ANSI Lumens
  - 3,000 ANSI Lumens

**29dBA Normal mode Daytime mode**
