RX730GAX
788Ltr Mirror & Black Glass finish INVERTER Refrigerator
MADE IN JAPAN SERIES

Features

- 788lt Capacity
- Multi Drawer French Door INVERTER refrigerator
- Only 450kWh per year power consumption
- Warranty: 5 Year Parts & Labour Warranty (Additional 5 Years Parts Warranty on the Inverter Compressor)
- Vacuum Compartment with Platinum Catalyst
- Auto Doors (Slide or Touch)
- Auto Open Drawers (Lower Freezer Compartment and Vegetable Compartment)
- Touch Screen Controller
- Energy Saving Mode
- Delicious Freezing - Quick Freeze Drawer
- Aero-Care Vege Compartment with Platinum Catalyst
- Hitachi Original Flexible Vacuum Insulation Panel for large capacity and energy saving performance
- Frost Recycling Cooling Technology
- Multiple storage compartments for Fresh and Frozen Foods
- Auto Ice Maker
- Scratch-Resistant Tempered Glass Door
- Triple Power Deodorisation
- Mirror or Black Glass Finish

Vacuum Compartment with Platinum Catalyst

Hitachi’s uniquely designed Vacuum Compartment uses a vacuum pump to extract air and reduce oxygen to suppress oxidation, thus ensuring freshness of food while retaining its nutrients. Furthermore, the airtight structure of the compartment confines moisture inside, helping to prevent food dehydration. Seasoning is absorbed at a faster rate to assist in speedier food preparation.

Platinum Catalyst
Odour components from meat and fish are broken down by the Platinum Catalyst to generate carbon dioxide. The carbon dioxide dissolves in water on the surface of food items to make the surface weakly acidic, suppressing enzyme strength to minimize freshness loss.
Easy-to-Open Auto Doors
Just touch the control panel with a finger and the door opens. You can also open both doors with a single swipe.

Easy-to-Open Auto Drawers
Easy-to-Open Auto Drawer (Vegetable & Freezer Drawers). The drawer slides out effortlessly even if it's full of items and heavy.

Delicious Freezing - Quick Freeze Drawer
Delicious Freezing process reduces the time food takes to be frozen. Ice crystal formation is reduced and moisture retained.

Vacuum Insulation Panel
Vacuum Insulation for maximised Efficiency

Easy Access Storage Drawers

Platinum Catalyst’s Freshness Preservation
Ethylene gas released by vegetables can spoil their freshness. Platinum catalyst technology has the ability to decompose the ethylene gas and convert it into carbon dioxide gas, delaying spoilage by making vegetables dormant to preserve freshness.

Hitachi’s Frost Recycling Cooling Technology
Chilled air generated by frost is sent to fridge compartments to cool them even when the compressor is not operating, reducing the energy consumption of the fridge.
