# Home and life solutions

People have always thought of consumer products as being for a single purpose. Hitachi Home and Life Solutions are engineering a new phase of product development – one where consumer products are interactive and serve multiple purposes.

As the evolution unfolds, consumer products will begin to incorporate digital, network and sensor technologies. These products will become increasingly incorporated into every day life, creating an entirely new level of relationship between people and their products.

We are changing the shape and quality of people's lifestyles while positioning Hitachi as a cutting edge brand that leads future development and is the global brand of choice.

In today's modern kitchen, where good taste is the order of the day, you need a refrigerator that delivers on both superior styling and function. Through years of technological development and sophisticated design, Hitachi introduces you to one of the most advanced refrigerator ranges on the market.

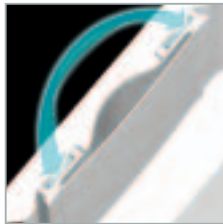

A refrigerator range that not only symbolises your appreciation of good taste from the outside but retains the good taste of the food on the inside.

**REFRIGERATION RANGE**

# Features

## SILVER ION DEODORISER

The special deodoriser built into the air duct uses Silver Ion to help neutralise bacteria and odours throughout the refrigerator. Your food will last much longer than in conventional refrigerators while the odours produced by spoilt food will be greatly reduced.

## ADVANCED MULTI-FLOW SYSTEM

The advanced multi-flow air distribution system chills or freezes your food quickly and efficiently. The freezer evenly distributes air from both the front and the back while the refrigerator compartment delivers super cold air to multiple sides of the food at once. This system allows cold air to circulate evenly around the refrigerator to keep all areas at a consistent temperature.

Multi-flow for 480 series shown.  
Other models may differ in flow pattern.

## HUMIDITY CONTROL SYSTEM

The special Humidity Control System gives you the added flexibility of altering the climate to suit a variety of different fruits and vegetables, keeping your food fresher for longer.

## GLIDE OUT CRISPER

Storing vegetables should be effortless. That's why Hitachi has introduced the glide-out crisper. The four rollers allow you to access your vegetables quickly and easily.

## MOULD-PROOFING DOOR GASKET

The door gasket, which is prone to getting dirty and can be hard to get at, has undergone mould-proofing treatment for easier cleaning.

\*See warranty card for further details.

## TWIST ICE TRAYS

The convenient twist ice trays and large storage bank ensure you will always have ice on hand whenever you need it.

## WARRANTY

2 year in-home parts and labour warranty.  
Additional 3 year parts warranty on compressor.\*

#### QUICK FREEZING

Simply pressing the 'Freezing' button sets the freezer into "Quick Freeze" mode. This allows food and water to be frozen in a third less time than conventional freezers. As well as creating ice quickly, "Quick Freeze" also helps maintain the original taste of frozen foods and ensures they can be stored for longer.

#### POWER SAVING

When away on holidays or, if only storing a small amount of food, it seems unnecessary to have the refrigerator running at full power all the time and wasting your money.

To prevent this Hitachi has introduced a clever 'Power Save' function that, when pressed, runs your refrigerator at 20% less power while still keeping your food in perfect condition.

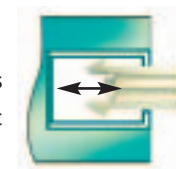

#### ANTI-BACTERIAL DOOR COATING

The stainless steel model has been covered with a transparent coating that has an anti-bacterial agent in it. The special coating makes it resistant to dirt and fingerprints, so it can be easily cleaned.

#### EASY, CHANGEABLE SHELF SUPPORT

The unique shelving support system gives you the flexibility of changing the height while unobtrusively hiding away the supports when not in use.

Features vary depending on model, please see specifications for details.
